*A 110 Year Cycle of Serving,
Fostering and Advancing the
Seed Business*

2021 marks the 110th anniversary of the Wetzel Seed Company. Originally known as D.M. Wetzel & Son, the company's origins are traced to its founder, Daniel M. Wetzel, conducting experiments at the turn of the century in seed-corn testing, planting and propagation in the soil of Rockingham County, Virginia.

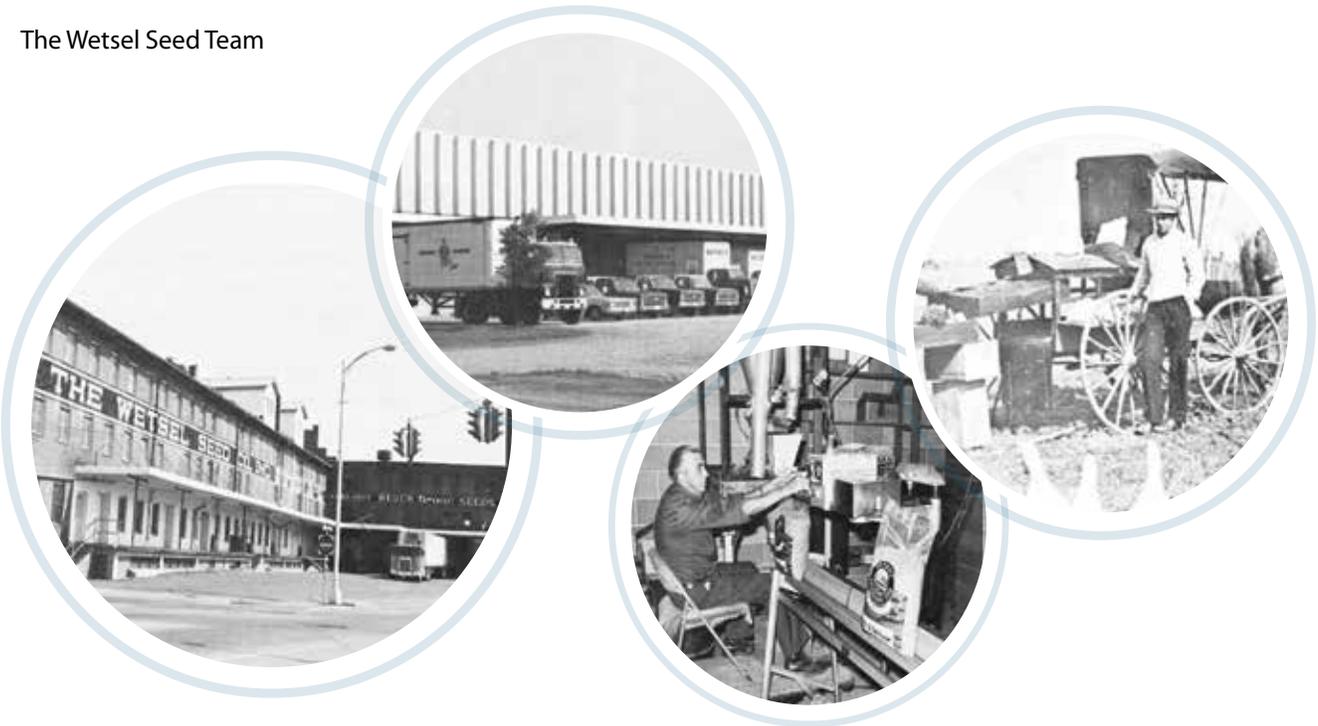

Wetzel Seed quietly out grew a traveling wagon and opened its first seed store in Harrisonburg VA in 1911. Having survived multiple droughts, two World Wars and the Great Depression, Wetzel has grown to become one of the most respected seed companies in the country.

Today, we are committed to offering you the highest quality seeds and professional advice for all the products contained in this Seed Reference Guide. BFG is proud to have the Wetzel Seed brand as an important part of its leading product offering. We look forward to continuing the legacy of providing quality seeds started by Daniel M. Wetzel 110 years ago.

The Wetzel Seed Team

**First Catalog
1914**

2014 Seedsman of the Year
Mike Steiner receiving his award from the
Atlantic Seed Trade Association

In our 110th year in the seed business, we are proud to provide you with our Seed Reference Guide. We know Seed. Atlantic Seed Trade Association Past President and 2014 Seedsman of the Year is our Mike Steiner who manages our Turf and Farm Seed categories.

DECLARATION OF APPLICANT

Account Application. Applicant has requested credit from BFG Supply Co., LLC (referred to herein as "BFG Supply Co."). Whenever "BFG Supply Co." or "Secured Party" are used throughout this Application, such terms shall include both of the entities identified above and either of the entities identified above shall be entitled to rights, interests, and remedies set forth in this Account Application. By its execution of the Account Application the Applicant affirms and certifies that the information provided on the Credit Application is true and correct.

Release of Credit Information. The signing of this application authorizes BFG Supply Co. to perform credit investigation(s) of the Applicant. Applicant authorizes any references to release information necessary for BFG Supply Co. to make an informed credit decision. BFG Supply Co., is authorized to make all inquiries deemed necessary to determine the credit worthiness of Applicant including with any third parties with which the Applicant has or is conducting business and any additional third parties that BFG Supply Co. deems relevant. BFG Supply Co. is hereby authorized to answer questions about its credit experience with Applicant and to provide information regarding its credit experience with Applicant. If the undersigned individual is not the Applicant, but an authorized representative of Applicant, then the undersigned individual recognizes that his or her individual credit history may be a factor in the evaluation of the credit history of Applicant and hereby authorizes BFG Supply Co., to perform the necessary credit investigation and make all inquiries deemed necessary to determine the creditworthiness of the undersigned individual.

Grant of Security Interest. Grant of Security Interest. To secure payment and performance of all obligations, now existing or hereinafter arising, Applicant hereby grants Secured Party, a continuing security interest in all inventory, equipment, and goods manufactured by, supplied, or distributed by Secured Party, whenever sold, consigned, leased, rented or delivered, directly or indirectly (including via retail establishments/stores), to or for the benefit of Applicant by Secured Party, including but not limited to greenhouses and/or nursery supplies, soils, fertilizers, chemicals, and containers, polycarbonate materials, bamboo materials, and seeds, wherever located, now owned and hereafter acquired, including but not limited to all Secured Party, brand products and any replacement products, parts, accessories and supplies including repossessions and returns, all proceeds from the sale, lease or rental thereof and all existing or subsequently arising accounts and accounts receivable and supporting obligations which may from time to time hereafter come into existence during the time any obligations to Secured Party, remain outstanding (the "Collateral"). Applicant agrees to execute and deliver to Secured Party, upon request, such instruments and assurances as Secured Party deems necessary or desirable to establish, confirm and maintain perfection of Secured Party's rights and interest in the Collateral. In connection with the security interest granted by Applicant, Secured Party may file and/or record any financing statements and/or fixture filings deemed necessary by Secured Party to protect its rights and interests in the Collateral. Applicant hereby authorizes Secured Party to file all financing, continuation and amendment statements and such other documents as Secured Party deems necessary or desirable to protect its right, title and interest in the Collateral. In addition, Applicant hereby ratifies its authorization for Secured Party to have filed in any jurisdiction any financing statements or amendments thereto if filed prior to the date hereof. Applicant authorizes Secured Party to file a Uniform Commercial Code (the "UCC") Financing Statements in the filing office of any jurisdiction(s) Secured Party deems to be appropriate pursuant to the UCC. Debtor waives its right to receive a verification statement evidencing the registration of a UCC/PPSA Financing Statement or UCC/PPSA Change Statement.

Covenants of Applicant. Applicant will maintain the Collateral in original condition but for the ordinary wear and tear and will insure the Collateral against all expected risks. Applicant will not subject the Collateral to any adverse encumbrance or lien, or sale or other transfer other than as approved in writing by BFG Supply Company, LLC. Applicant will not locate the Collateral at any location other than as known to BFG Supply Co. Applicant will promptly advise BFG Supply Co. of any change of Applicant's name or business nature, location, and business openings and closings.

Account Application. The following constitute Applicant defaults: (i) non-payment in timely fashion of Applicant's indebtedness to BFG Supply Co., (ii) bankruptcy, insolvency or assignment for the benefit of creditors or (iii) misrepresentation or breach in respect of any provision of this or any agreement between BFG Supply Co. and Applicant. In the account application, BFG Supply Co. may declare all unpaid balances due and payable and/or may require Applicant to assemble the Collateral and make it available to allow BFG Supply Co. to take possession or dispose of the Collateral. Applicant further agrees to pay all reasonable attorneys' fees and all other costs and expenses incurred by BFG Supply Co., in the collection of any obligation of Applicant under this Account Agreement or related to any amounts that are or become due from Applicant to BFG Supply Co. In the account application, BFG Supply may remove Applicant's credit limit with no requirement for written notice to Applicant of the same and may conduct any credit investigation on the Applicant or any Guarantor upon an account application. The Applicant agrees that any statute of limitations related to pursuing any claims against the Applicant or any obligors on any debt incurred under this Account Application, shall be "tolled", postponed, extended, and delayed such that the same begin to run for the date of the last payment made on any indebtedness owed under the Account Application.

Miscellaneous. The information contained herein is submitted by Applicant for the purpose of obtaining credit. Applicant expressly agrees to make payment in full to BFG Supply Co. for any purchases made from BFG Supply Co. in accordance with the terms of all invoice(s) issued by BFG Supply Co. Should Applicant default in any such payment, Applicant expressly agrees to pay a late charge on any amounts in default of 2% per month (annual rate 24%), and, all amounts owed to BFG Supply Co. by Applicant may, at the option of BFG Supply Co., become immediately due and payable. The terms and conditions of sale are subject to and will be construed in accordance with the terms and conditions of sale in effect for BFG Supply Co. and with the laws of the State of Ohio. The latest version of Terms and Conditions is listed at www.bfgsupply.com. The parties hereto hereby agree that any such litigation between them may be filed, tried and litigated in a federal or state court located in the State of Ohio or the State of Indiana. In connection with the foregoing, the parties hereto irrevocably consent to the jurisdiction and venue of such courts and expressly waive any claims or defenses of lack of jurisdiction of or proper venue by such court. This Agreement and any purchase orders between the parties constitute the entire agreement of the parties hereto with respect to the subject matter hereof and shall be deemed to supersede all prior and contemporaneous agreements, representations, and understandings, whether written or oral.

Severability. This Agreement is intended to be in compliance with all laws and regulations. In the event that any one or more of the provisions or terms contained in this Agreement should be adjudged to be invalid, illegal or unenforceable in any respect, the validity, legality and enforceability of the remaining provisions and terms contained in this Agreement shall not in any way be affected or impaired thereby, and shall be otherwise valid, legal and enforceable.

GUARANTY

In consideration of credit being extended by BFG Supply Co. to the Applicant identified above, whether Applicant be an individual or individuals, a proprietorship, a partnership, a corporation, or other entity, the undersigned guarantor or guarantors (collectively, the "Guarantors") each hereby (jointly and severally if more than one) unconditionally guarantee to BFG Supply Co. the faithful payment, when due, of all obligations of the Applicant to BFG Supply Co. together with all fees and expenses incurred in a suit to enforce this Guaranty. The Guarantors each hereby expressly waive (i) all notice of acceptance of this guaranty, (ii) all notice of extensions of credit to Applicant, (iii) presentment and demand for payment, (iv) protest and notice to the Guarantors of dishonor or default by Applicant, and (v) all other notices to the Guarantors and all defenses given to sureties or guarantors at law or in equity other than payment. By signing below, the Guarantors authorize BFG Supply Co. to make all inquiries deemed necessary to determine the creditworthiness of the Guarantors. BFG Supply Co., is authorized to answer questions about its credit experience with the Guarantors and to provide information regarding its credit experience with the Guarantors. The Guarantors acknowledge that execution of this guaranty is a material part of the consideration upon which BFG Supply Co., is relying on to extend credit to the Applicant, that this guaranty is executed as an inducement to BFG Supply Co. to consummate such extension of credit, and that this Guaranty is in the Guarantors' interest and to the Guarantors' direct or indirect benefit.

Terms and Conditions of Sale 2020

BFG Supply Co., LLC referred to as BFG

RELATIONSHIP TO ACCOUNT APPLICATION

These Terms and Conditions together with the Account Application and any fully executed Agreements between the parties contain the entire understanding between the parties as to all matters referred to herein. No other representations, covenants, undertakings or prior or contemporaneous agreements, whether oral or written, regarding any matters that are not specifically contained and incorporated in this Agreement, shall be deemed to have any effect or binding impact upon the parties. The language of this Agreement shall be construed according to its fair meaning and in accordance with its purpose and without regard to whom may have drafted any particular provision herein. For purposes of these Terms and Conditions "Customer" shall mean the legal entity that is a part to any BFG Supply Co. Account Application, or any Order placed with BFG Supply Co. and "Guarantor" shall mean any individual that executes the BFG Supply Co. Account Application as a guarantor.

ACCOUNT APPLICATION

Payment terms are stated on your invoice. Discounts may be offered on certain products in certain situations and will be specified on the invoice. These discounts, if offered, are only available on invoices paid and received into the BFG office within the terms outlined on your invoice via cash or check and payments via credit card are not eligible for discounts. Buyer is responsible for mail time and discounts are only available if BFG actually receives eligible payments during the time frame set forth in these Terms and Conditions. Post marks will not be considered. A finance charge of 2% per month (24% annually) will be assessed on invoices not paid within invoice term date. Payments received towards balance will first be applied to finance charges unless otherwise stated in writing by BFG. BFG reserves the right to assess the maximum amount of finance charges permitted by applicable law. BFG has the absolute discretion to place an account on C.O.D. status until past due balances, including finance charges, are satisfied in full and BFG has determined that Buyer is eligible for the reestablishment of a credit line in BFG's sole discretion. Any failure of the Buyer to satisfy any of its obligations under a Account Application with BFG, including but not limited to the failure to satisfy amounts due within payment terms shall comprise an event of default. In the event of default, if BFG must employ a collection agency or attorney to collect any past due account, Buyer shall be responsible for the satisfaction of all amounts incurred in collection of any past due account including collection costs and attorney fees.

PAYMENTS

Visa, MasterCard, Discover and American Express are acceptable payments at the time of purchase up to \$10,000 or higher as approved by BFG. Payments made after a finalized sale that require (or per request) a change in terms will be charged a 3% convenience fee. Please call BFG Accounts Receivable department at 800-883-0234 Ext 4997. Mail payments by check to BFG Supply Co., 3874 Solutions Center, Chicago, IL 60677-3008

ACCOUNT APPLICATION AND TAX EXEMPT FORMS

Account can be established by submitting a completed BFG Supply Co. Account Application. Allow three to four weeks for complete processing. In addition, a tax-exempt form for your state must be on file with BFG or taxes will be charged on all purchases. The Account Application must be completed in its entirety to avoid processing delays. Failure to provide all information will result in adverse action with respect to Buyer's application for credit, including declining the application.

INVOICES/STATEMENTS

Product will be invoiced on the date product is shipped from BFG or when delivery information is received from a manufacturer shipping direct. BFG will make good faith efforts to transmit monthly Account Statements at the beginning of each calendar month. Account Statements are reminders of open invoices, however, Account Statements do not grant an additional amount of time to remit payment. Please follow the terms indicated on your individual invoice. Copies of invoices can be located at www.bfgsupply.com or contact BFG at 800- 883-0234. All these documents may be mailed, faxed, or e-mailed. Please contact BFG Supply Co., LLC or visit www.bfgsupply.com with your choice preference.

RETURNS

Our merchandise is sold on an outright sale basis and is not subject to return unless mis-shipped, damaged or defective. Any shipments refused for reasons other than freight damage will be subject to freight charges both ways as well as a restocking charge. If merchandise is mis-shipped, please contact our office for return authorization. We will arrange return transport and credit.

DAMAGE/SHORTAGE/DEFECTIVE ITEMS CLAIMS

Damage in shipment claims on items shipped via Fed-Ex/UPS/etc., must be made within one (1) business day (24 hours) of receipt of the merchandise. All claims for shortages and defective items must be reported to us within one (1) business day (24 hours) of delivery. All claims regarding billing errors, (pricing, terms, etc.) must be reported to BFG Supply or our representative within 30 days of delivery. Immediately upon receipt of truck shipments, examine the shipment carefully before signing the freight bill. If damage or shortage is evident, do not accept shipment without notation on the freight bill by the driver. Failure to do so may prevent you from filing a claim with the carrier. If you need assistance regarding damage claims, please contact your nearest BFG service location. A photograph of damaged product needs to be included with any damage claim. Merchandise found to be defective will be picked up (or field destroyed if you are advised to do so) and full credit will be issued provided the merchandise does not look like it has been abused or misused and is in accordance with the manufacturer's warranty policy. BFG Supply is not liable for damages, injuries or loss of revenue as a result of a manufacturer's defective item.

DELIVERIES

Title and risk of loss pass to the Buyer upon delivery of the Product. BFG delivers to customers in designated delivery areas according to an established daily routing schedule. Although we do our best to run the same routes on the same days each week, unavoidable circumstances may arise which prevent us from adhering to our normal schedule. Please note that we will do our best to make sure you receive the product you need when you need it. BFG delivery charges vary by location. Please contact your local BFG service center for pricing. Or ask your Sales Representative or Customer Service Rep for current delivery charges. Backorders may be subject to delivery charge. Delivery via BFG vehicles or trucks is subject to the equipment available at the BFG Service Center and the ease of access to the destination. Please contact your delivering service center for details. Some orders may be shipped via Fed-Ex/UPS/ Etc. at the buyer's expense and are subject to an additional order handling charge. Deliveries outside of our designated area may not ship via BFG and additional freight charges may apply. Please check with the local BFG location for complete details. Please note: all flower and vegetable seed for plant growers are shipped from our Harrisonburg Facility. No orders may be shipped via UPS for a C.O.D. purchase. These orders must be prepaid. Advanced payment arrangements must be made with your local BFG Service Center for all BFG truck deliveries. BFG drivers do not carry cash. Important: All orders for delivery via BFG tractor-trailer must be phoned or faxed in at least 48 hours prior to your scheduled delivery day. BFG will accept "add-on" orders before 10:00 a.m. on the business day prior to your scheduled delivery day but cannot guarantee that they will fit on the trailer. It is necessary that the customer has appropriate personnel present to assist our drivers in unloading.

WILL CALLS

Customers who wish to pick up merchandise from our warehouses are most welcome to do so. However, merchandise is not available in all locations; please call to verify if item is stocked. To help expedite your order, please call your order in ahead. Orders for pick up in the morning should be called into the office by 5:00 p.m. the day before. You may pick up items between 8:00 am-4:30 pm.

RECOMMENDATIONS

All recommendations made by BFG are compiled from recognized horticultural sources or BFG's knowledge of recognized industries. BFG makes no warranties regarding any recommendation made and BFG is not responsible for any alleged losses of Buyer due to any recommendations given by BFG Supply Co. or its personnel.

NOTICE TO PURCHASER

Seller's and manufacturers' only obligations shall be to replace such quantity of product proved to be defective. Before using, users shall determine the suitability of the product for their intended use, and users assume all risk and liability whatsoever in connection therewith.

WARRANTIES

BFG makes no warranty of any kind, whether that be expressed or implied. Except as expressly provided in these Terms and Conditions, all implied warranties or conditions (whether statutory or otherwise) are excluded to the fullest extent permitted by Law. BFG makes no warranty respecting the merchantability of the products or their suitability or fitness for any particular purpose, non-infringement of third-party rights nor does BFG make any warranties against latent defects.

Some product(s) sold by BFG may be accompanied by manufacturer warranties from the party that provided BFG with the product(s). All such warranties shall be the responsibility of the manufacturer of the product(s) purchased from BFG, if any warranties exist.

Credits are limited to the amount of the original sale. Because of varied interpretations of standards at the local level, Seller cannot warrant that the product meets the requirements of the Occupational Safety and Health Act, or of any local acts or codes that may apply. In the event of litigation through the courts arising from any purchase, the Buyer consents to and submits to the jurisdiction and venue of the courts of Marion County, Indiana. Mail, phone, and internet orders accepted are subject to these terms and the Buyer in acceptance of the shipment agrees to these terms.

BFG Supply warrants to the extent of the purchase price that seeds or bulbs sold are as described on the container. Subject to the limitation of liability set forth in the preceding sentence, BFG provides a limited warranty that at the time of delivery, seeds or bulbs sold by BFG are as described on the container, within recognized tolerances. As set forth above, BFG gives no other or further warranty, expressed or implied. Note: Every effort has been made to provide current, accurate product information. Product guides/catalogs are intended to represent the many products offered by BFG Supply Co. Call your servicing BFG warehouse for updated product information or if you don't see a product or size you need. Chances are we can help you. Here are three points to keep in mind as you prepare to place your order:

- 1. Order early because stock availability of some items is unpredictable.
- 2. Prices included in any BFG product guides are intended as instructive guidelines only.
- 3. Prices may change without notice.

FORCE MAJEURE

BFG is not liable for failure to fulfill its obligations for any accepted Order or for delays in delivery due to causes beyond BFG's reasonable control including, but not limited to, acts of God, natural or artificial disaster, riot, war, strike, delay by carrier, shortage of products, acts or omissions of other parties, acts or omissions of civil or military authority, government priorities, changes in law, material shortages, fire, strikes, floods, epidemics, quarantine restrictions, acts of terrorism, delays in transportation or inability to obtain labor, materials or products through its regular sources, which shall be considered as an event of force majeure excusing BFG from performance and barring remedies for non-performance. In an event of force majeure condition, the BFG's time for performance shall be extended for a period equal to the time lost because of the force majeure condition without subjecting BFG to any liability or penalty. BFG may, at its option, cancel the remaining performance, without any liability or penalty, by giving notice of such cancellation to the Buyer.

PROVISION OF AND RELIANCE UPON ACCURATE FINANCIAL INFORMATION

BFG makes all decisions related to the extension of credit to the Customer based upon the disclosures made by the Customer in the BFG Supply Co. Account Application. All parties executing these Terms and Conditions and the Account Application represent and warrant that the information provided to BFG Supply Co. are true and accurate in all respects. BFG Supply Co. is a wholesale distributor and does not as a part of its general practice sell to individuals. All parties executing these Terms and Conditions and the Account Application further represent and warrant that the Customer is a legal entity validly existing and authorized to do business in the State of its formation at the time of the execution of the BFG Supply Co. Account Application and that any changes in the status of the Customer as a legal entity will be disclosed to BFG Supply Co. within ten (10) business days of the occurrence of any changes in the status of the Customer. If Customer is a limited liability company, corporation, or a partnership, Customer must provide BFG Supply Co. with its Tax Identification Number contemporaneous with the execution of these Terms and Conditions. If Customer is a sole proprietorship, Customer shall provide BFG Supply Co. with Schedule C to its tax return.

These Terms and Conditions may be found at www.bfgsupply.com. These Terms and Conditions of Sale are subject to revision and change by BFG Supply Co. without notice, however, the then current Terms and Conditions maintained at www.bfgsupply.com shall be applicable to an given order at the time it is made and shall control.

Customer and, if applicable, all Guarantors hereby execute and agree to these Terms and Conditions and agree to be fully bound by the same.

By its execution of the terms and conditions the applicant affirms and certifies that the information provided on the account application is true and correct. By its execution the applicant acknowledges they have read, understand and agree to be bound by these Terms and Conditions and that they will comply with all of the requirements set forth in these Terms and Conditions.

Patio Seeds

New for 2021!

Introducing our new line of patio seeds, specially chosen for the unique growing conditions of container gardening. A perfect selection for those with small growing spaces including apartments, porches, and decks.

Cucumbers

A: Peticue

new

Short vining/bush takes up 1/3 the space of standard cucumbers. Harvest at 7" for the best tasting, crunchy-sweet cukes.

10 Seed Pkt **WET78259**
 100 Seeds **SYNGS78250**
 500 Seeds **SYNGS78254**
 1000 Seeds **SYNGS78251**
 5000 Seeds **SYNGS78255**

Hybrid

B: Salad Bush

Compact tiny 18in vines that yields full-sized, full-flavored slicer type fruit. The cylindrical fruit is long and uniform in shape with a tender and crisp flavor. An excellent variety to grow in containers or in small gardens.

10 Seed Pkt **WET24469**
 1000 Seeds **PETO24464**

Hybrid

Muskmelon

C: Minnesota Midget

Heirloom

3ft compact vines produce large crops of 4in melons with thick meaty gold yellow flesh. The high quality melons have a unique flavor with a high sugar content and are edible to the rind. Rind has fine dense netting.

1g Pkt **WET28819**
 1/2oz **VEG28814**

Cucumbers

	Days to Maturity	Spread	Fruit Color	Fruit Size	Disease Resistant
A	45-60 Days	24in	Green	7-9in	None Reported
B	55-60 Days	18in	Dark Green	6-8in	Downey Mildew, Powdery Mildew, Moasic Virus & Scab

Muskmelon

	Days to Maturity	Spread	Fruit Size	Weight	Ribbing	Netting	Flesh Color	Disease Resistant
C	60-70 Days	3ft	4-5in	1-2lbs	Shallow	Fine, Dense	Golden Yellow	Early Resistant to Fusarium Wilt

Onion

A: Japanese Bunching

A vigorous and quick to mature green bunching onion variety that does not bulb but forms clusters of long silvery white stalks. It is a perennial that is cold hardy and very adaptable to various climates. It has a mild, sweet flavor much like a scallion, perfect in both Asian and American cuisines.

Watermelon

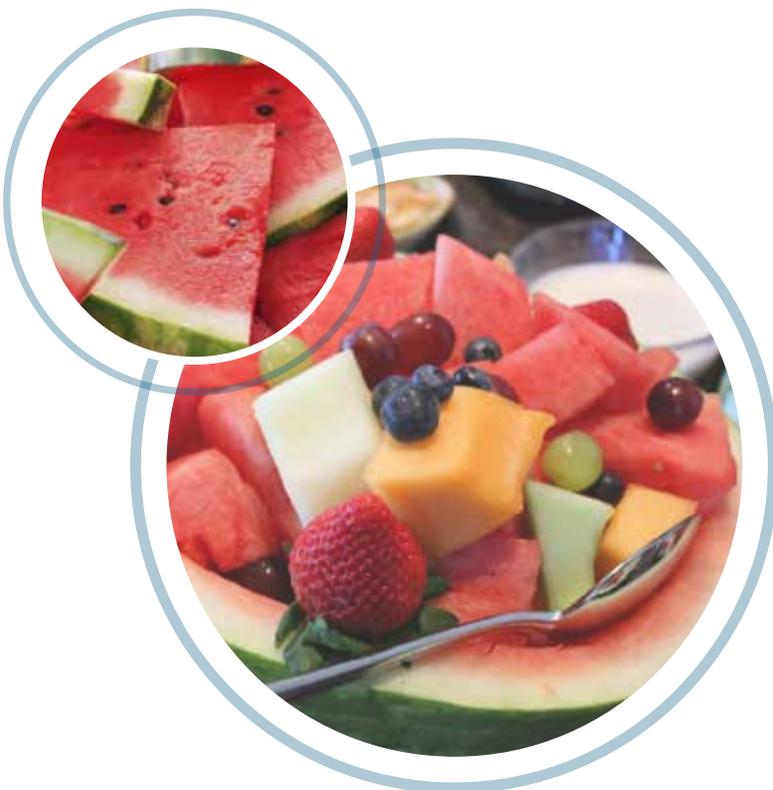

A: Cal Sweet Bush

This is a true short internode (the sections between the stem joints) watermelon. These watermelons have compact, bushy vines and still provide enough foliage cover to protect the fruits. Each plant yields 2-3 fruits. Cal Sweet Bush is a great watermelon choice for gardeners with limited space or those wanting a container melon.

Endive

**C: Broad Leaf Batavian**

Hardy and cold resistant Italian variety that produces deeply cut dark green leaves that have thick, white midribs and are very tufted. As the plants grow the outer leaves can be harvested leaving the center to continue to grow. The fine frilly leaves are succulent and delicious with a pleasant, mildly bitter flavor, typically a little more bitter than broadleaf varieties. The hearts can blanche to creamy white if leaves are tied the last 3 weeks of growth. Adds a tasty and unusual punch to salads.

Bean Variety & Uses

- Green beans: Though referred to as green, these slender beans with tiny seeds tucked in the pods can also be yellow or purple. When cooked, the purple beans turn green.
- Haricots verts (ah-ree-koh VEHR): French for "green string bean," haricot meaning "bean" and vert meaning "green." These tiny beans are picked young and prized for their slightly sweet flavor and crisp texture. They are similar to green beans, but are smaller and thinner, and cook more quickly. They can also be yellow or purple.
- Pole beans: This type of bean requires a pole to grow on. It climbs its support readily and allows for easier picking. These beans are longer and broader than regular green beans and may be flat or round. Pole beans taste like green beans, but they are tougher than other snap beans and need to cook longer.
- Rattlesnake beans: An heirloom variety of pole bean, this bean gets its name from its dappled skin. Cook them as you would other varieties of pole beans. Once cooked, these beans turn green and lose their unique coloring.
- Runner beans: One of Britain's favorite green beans—often called "Kentucky wonder beans" in the U.S.—comes from a climbing plant. The scarlet runner bean has a long, thick pod that's meaty and tender and does not have a string when young. Young runner beans may be prepared the same way as green beans.
- Wax beans: As a pale yellow variety green bean, their waxy texture earned them the name. Wax beans can also be purple and light green. Though not as flavorful as green beans, they can be treated like green beans for cooking purposes.

Beets

A: Chiogga

Sometimes known as "Candy Cane Beet". Is very tender, mild and sweet flavor in a round red globe shaped root with a unique red and white striped interior.

4g Pkt **WET12029**
 1/2oz **VEG12024**

B: Early Crosby Egyptian

Older variety with deep red, flattened shape roots with a dark red interior and tops that grow up to 16in. A delicious beet ideal for pickling, boiling or baking.

4.5g Pkt **WET12059**
 1/2oz **DSI12054**
 1/2lb **DSI12051**

C: Cylindra

A unique beet that grows a 5-6in root with a sweet flavor. long, cylindrical roots. Excellent for slicing with its uniform diameter. Makes a great pickling beet.

4.5g Pkt **WET12009**
 1/2oz **CHAR12004**
 1/2lb **CHAR12001**

D: Detroit Dark Red

An all-purpose sweet and tasty beet that has a globe-shaped root with 13-15in tops that make good greens.

4.5g Pkt **WET12019**
 1/2oz **CHAR12014**
 4oz **CHAR12016**
 1/2lb **CHAR12011**
 25lb **CHAR12017**

Heirloom

E: Early Wonder Green Top

Also known as Tall Top. Dark red beet with slightly flattened red roots and green, red-veined tops that grow up to 18in long. Perfect pickled, fresh or cooked.

1/2oz **CHAR12054**
 1/2lb **CHAR12053**

Cucumbers

A: Sweet Success

A Gynoecious (all-female) variety that is Burpless and produces huge, slender and uniform fruit with thin skin that does not require peeling. Burpless means that the fruit is bitter-free and the production of female blossoms only can significantly increase the productivity of a single plant. This vigorous variety sets fruit without pollination and is a hybrid slicing cucumber that produces loads of long, straight, spineless fruit. The flesh is terrifically flavorful with a sweet, mild and is truly seedless if grown away from other cucumbers.

Leeks

C: American Flag

Also known as "Giant Musselburgh" or "Scotch Flag". A very hardy "overwintering" variety onion relative that produces a tasty pearl-white bulb with huge green leaves and forms appealing white stems which have a creamy yellow heart. Stems grow 10-15in long and about 2-3in in diameter. The delicate onion flavor makes them perfect for soups, stews and salads, but can also be used effectively in salads.

Lettuce

A: Green Ice

Moderately fast growing and one of the earliest maturing varieties that lasts well into summer. Bred as a cross between 'Grand Rapids' and 'Fordhook,' Green Ice varieties, combining the large, ruffled look of a looseleaf with the crunchiness of a crisphead lettuce. The large clusters of glossy, ruffled loose leaves are juicy and extra crisp with a crunchy texture. Tends to be tighter, more compact and flavorful than other loose head types.

3g Pkt **WET28139**
 1/2oz **DSI28134**
 1/2lb **DSI28131**

B: Hanson Improved

Good yielding crisphead variety also known as 'Ewing's Excelsior,' 'Gardener's Favorite' and 'King of the Market.' The exterior leaves are somewhat crumpled and frilled at edge with very distinctive midrib wrapped around a delicious very lightly colored heart. This variety is always sweet, never bitter with a very crisp and sweet flavor. Perfect for sandwiches, salads and garnishes.

3g Pkt **WET28149**
 1/2oz **DSI28144**
 1/2lb **DSI28141**

C: Iceberg

Large late maturing variety that is by far the most popular lettuce in the stores. The tightly formed, compact crisp firm leaves on the outside are fringed and heavily ruffled giving way to large solid hearts that are blanched to silvery white color. The sweetest leaves are in the center. The mild flavored and crunchy texture of the tasty exterior leaves and heart are perfect for salads, sandwiches or as a garnish.

Lettuce

A: Red Salad Bowl

Early maturing, fast growing lettuce that grows well all season. The radiant big rosettes of deeply-lobed, finely divided, delicate oak-like leaves are grown for its beauty as well as flavor. Cooler weather intensifies burgundy color. The leaves have a crisp, tender, with sweet and spicy tones and will not turn bitter. Harvested as baby greens about 25 days, and 55 days for mature heads. This is a Red version of the Salad Bowl variety.

Mustard

**A: Florida Broadleaf**

Extremely vigorous bush that rapidly produces large quantities of big, broad, rich green leaves. The leaves have a mild-flavor that can be harvested as small leaves for baby greens and added fresh to salads or mature large leaves that can be steamed, boiled or braised.

4g Pkt WET29019
 4oz CHAR29016
 1/2oz CHAR29014
 1lb CHAR29012

**B: Old Fashion**

Heirloom

Quick growing bush that produces good yields, however it does bolt early. This variety makes up for that with its amazing flavor, regarded by many as the tastiest mustard around. The long, narrow, deeply cut, and ruffled leaves are delicious either steamed or sauteed, or eaten raw in a salad.

4g Pkt WET29039
 1/2oz DSI29034
 1lb DSI29032

**C: Red Giant**

When harvested as microgreens, the very hardy small baby leaves are maroon in color with light green midribs. The leaves adds a nice hot tasty flavor to salad mixes while adding attractive color.

Pumpkins

A: Baby Pam

Moderate yielding variety that produces an average of 4-5 fruits per plant. The smooth, tough skin has an excellent canvas for painting or carving and each pumpkin has a thick, long, well rooted, tan handle. The dry, sweet flesh is the best of all the varieties for baking pies.

4g Pkt **WET30879**
 1/2oz **AGS30874**
 1/2lb **AGS30871**

B: Big Max

Heirloom

A squash-type variety that produces huge pumpkins that can exceed 100lbs. The nearly round shape has skin is very thick with bright orange, fine-grained flesh and 2-3in solid stems. Great variety for pies, canning, freezing and entering into the county fairs.

4.5g Pkt **WET30719**
 1/2oz **CHAR30714**
 1/2lb **CHAR30711**

C: Connecticut Field

Heirloom

Dependable yielding large field pumpkin that is the perfect variety for carving and decorating with its smooth, slightly ribbed exterior and flattened bottom so they don't tip over. Sweet, dry flesh is good for canning as well as baking pies.

4.5g Pkt **WET30739**
 1/2oz **CHAR30734**
 1/2lb **CHAR30731**

D: Dill's Atlantic Giant

This rough-skinned and beautifully ribbed pumpkin is the largest growing variety available on the market. It is common for this variety to reach 400-500lbs, but with special care they have been known to reach up to 2,000lbs.

1.7g Pkt **WET30689**

Pumpkins

**A: Jack-Be-Little**

Heirloom

Technically this variety is a type of squash, the very high yielding vines that can produce up to 20 fruits per plant. The tiny, cute pumpkin have smooth skin and are flat and ribbed, small enough to fit in the palm of your hand. While the flesh is good to eat, these little pumpkins are usually grown for decoration.

1g Pkt **WET30779**
 1/2oz **CHAR30774**
 1/2lb **CHAR30771**

**B: Jack-O-Lantern**

Heirloom

Specifically bred as a carving pumpkin with the uniform round to oblong shape, smooth, firm skin and nice thick stem that makes a good handle. The flesh is orange-yellow, fine grained and very good for baking pies and soups.

4.5g Pkt **WET30769**
 1/2oz **CHAR30764**
 1/2lb **CHAR30761**

**C: Lumina**

Also known as Ghost White. Vigorous growing vines that produce beautiful novelty pumpkins perfect for painting and carving. The very attractive exterior color is snowy white with a shiny finish and the fine-grained flesh is a pretty contrasting bright orange. They vary in size and come in very uniform globe to flattened globe shapes.

Radishes

A: Champion

High yielding large radish that is slow to become pithy (soft and spongy) and mature very fast. The scarlet smooth, round globes have white, mild, firm and crisp flesh that remains tender, sweet and mild, even at a Silver-Dollar size.

4g Pkt WET31039
 1/2oz CHAR31034
 1lb CHAR31032

B: Cherry Belle

Extra-early, high yielding large radish that will not become pithy (soft and spongy). The bright cherry red colored roots are globe shaped with firm flesh that is snow white, mild and crisp with a tender, sweet and mild flavor. Good packing variety.

4g Pkt WET31059
 1/2oz CHAR31054
 1lb CHAR31052

Heirloom

C: China Rose

Heirloom

Unique fall-winter Daikon type radish that is very hardy. The root resemble a carrot and can reach up to eight inches long with white, firm and crisp flesh that has a peppery spicy flavor. Excellent storage characteristics.

4g Pkt WET31179
 1/2oz DS31174
 1lb DS31172

D: Early Scarlet Globe

High yielding radish that is slow to become pithy (soft and spongy) and mature very fast. Very similar to Champion radish, but with a shorter top and slightly more round shaped root. The scarlet smooth, round globes have white, mild, firm and crisp flesh that remains tender, sweet and mild.

4g Pkt WET31079
 1/2oz CHAR31074
 1lb CHAR31072

E: Long White Icicle

Fast and easy to grow spring Daikon radish variety that forms long pure snow-white roots that resemble carrots. The white flesh is crisp and mild and less pungent than that of the round varieties, yet they have a pleasant spicy flavor without a bite.

4g Pkt WET31159
 1/2oz CHAR31154

Turnips

A: Golden Ball

Slightly more mild in taste than traditional turnips, Golden Ball turnip grows a 3-4 in golden yellow to amber globed-shaped roots.

4g Pkt **VEG37099**
1/2oz **VEG37092**

B: Purple Top White Globe

Heirloom

A high yielding hardy traditional variety that produces attractive roots and semi-erect prolific large lobed greens, the most widely grown turnip variety world wide. The edible smooth, slightly tapered globe shaped roots have tender, fine-grained flesh with a sweet and mild flavor. Best harvested when 3-4 inches in diameter. The top greens can also be cooked or used in salads. Good for storing, canning and freezing.

4g Pkt **WET37059**
1/2oz **CHAR37054**
4oz **CHAR37056**
1lb **CHAR37052**

C: Seven Top Foilage

Heirloom

A unique winter greens turnip variety that is not grown for the root but for the tasty greens instead. The roots are basically inedible, tough, woody and strong flavored. The flavorful greens leaves grow 18-22in tall, but should be harvested at about 6-10in when young and tender. Used fresh in salads like mustards, an kales, or steamed.

4g Pkt **WET37079**
1/2oz **CHAR37074**
4oz **CHAR37076**
1lb **CHAR37072**

D: White Lady

Hybrid

Easy to grow, uniform, vigorous, and quick-maturing white turnip grown for both its tender greens and smooth crisp and sweet globe shaped root. Flavor stays strong and texture firm, even when the roots are harvested late but best when picked at 2.5in diameter.

1.75g Pkt **WET37149**
1/2oz **SSA37144**

Turnips

	Days to Maturity	Maximum Height	Spread	Fruit Color	Fruit Size
<i>A</i>	45-55 Days	14-22in	12-15in	Golden Yellow	3-4in
<i>B</i>	55-60 Days	14-22in	12-15in	Reddish-Purple Above Ground, White Below Soil	4-6in
<i>C</i>	40-50 Days	18-22in	12-15in	Purplish-Pink Shading into White / Non-Edible	4-6in
<i>D</i>	30-40 Days	18-20in	10-14in	Pure White	3-4in

Watermelon

**A: Allsweet**

Very flavorful, fine-textured, extra sweet flesh with a thin tough rind to keep fruit from bruising. Holds long in the field

1/2oz **WHS37494**
1/2lb **WHS37491**

**B: Black Diamond**

Heirloom

Also known as the Black Cannonball. Very large melons, in perfect conditions weighing up to 75lbs. This variety is known for its juiciness and sweet taste and resistant to drought.

1/2lb **CHAR37481**

**C: Charleston Grey #133**

Heirloom

Large, juicy, sweet fruits with fiber-free flesh and a tough, medium-thick gray-green rind often used for making watermelon rind pickles.

4g Pkt **WET37519**
1000 Seeds **CHAR37510**
5000 Seeds **CHAR37515**
10000 Seeds **CHAR37516**
1/2oz **CHAR37514**
1/2lb **CHAR37511**

**D: Congo**

Large, deep red flesh is and very sweet and firm with one of the highest sugar contents of any melon. The rind is very tough thick, protecting the fruit from bruising.

4g Pkt **WET37539**
1/2oz **CHAR37534**
1/2lb **CHAR37531**

**E: Crimson Sweet**

Heirloom

Medium sized melon with sweet and mild, crisp deep crimson red flesh known for its high sugar content and great flavor. This variety has good keeping ability with its tough rind.

4g Pkt **WET37549**
1000 Seeds **CHAR37540**
5000 Seeds **CHAR37545**
10000 Seeds **CHAR37546**
1/2oz **CHAR37544**
1/2lb **CHAR37541**

**F: Dixie Queen**

Heirloom

Large, firm and solid, crisp and exceptionally sweet melon with a fine flavor. The thin but tough rind is a light greenish ivory color and is uniform in shape, size, color and quality.

4g Pkt **WET37559**
1/2oz **WWS37554**
1/2lb **WWS37551**

Watermelon

	Days to Maturity	Fruit Color	Fruit Shape	Weight	Disease Resistant
<i>A</i>	85-95 Days	Rind: Light Green Striped with Dark Green Flesh: Bright Red	Oblong	25-30lbs	Fusarium Wilt & Anthracnose
<i>B</i>	75-95 Days	Rind: Black-Green Flesh: Bright Red	Round-Oblong	30-50lbs +	Furarium Wilt & Anthracnose
<i>C</i>	85-100 Days	Rind: Light Grayish-Green Flesh: Bright Red	Oblong	20-35lbs	Anthracnose Race 1 & 3, Fusarium Wilt & Sunscald
<i>D</i>	80-90 Days	Rind: Light Green with Dark Stripes Flesh: Bright Red	Round	18-25lbs	Anthracnose Race 1 & 3, Fusarium Wilt
<i>E</i>	85-95 Days	Rind: Medium Green with Dark Stripes Flesh: Deep Red	Oblong	30-40lbs	Anthracnose 1-3
<i>F</i>	75-85 Days	Rind: Greenish-Ivory with Dark Green Stripes Flesh: Pinkish-Red	Round	30-40lbs +	Fusarium Wilt

Watermelon

A: Florida Giant

Heirloom

Very large melons, in perfect conditions it has been known to weigh over 200lbs. The flesh is juicy and sweet tasting and the rind is thick and tough making it a good shipping variety.

4g Pkt **WET37599**
 1/2oz **CHAR37594**
 1/2lb **CHAR37591**

B: Jubilee

Heirloom

Large, very tasty variety known for its finely-textured, bright pink-red flesh and deliciously sweet taste. The tough rind helps keep the fruit from bruising.

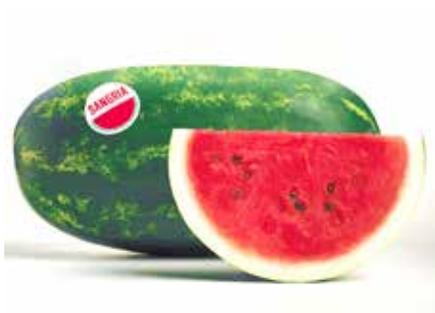

4g Pkt **WET37609**
 1/2oz **CHAR37604**
 1/2lb **CHAR37601**

C: Moon & Stars Red Flesh

A classic variety characterized by its dark green skin which is spotted with yellow spots, resembling a starry night. Red-fleshed variety.

1000 Seeds **WWS37501**
 5000 Seeds **WWS37505**
 10000 Seeds **WWS37506**

D: Sangria

Hybrid

Sangria is thought of as the "gold standard" of watermelons and sets the bar for eating quality. The medium sized variety has dark red flesh that is packed with sugars for an incredibly delicious unsurpassed taste.

1000 Seeds **SYNGS37680**
 5000 Seed **SYNGS37689**

E: Sugar Baby

Heirloom

The standard of "icebox" melons for years. Named "icebox" because it is small enough to fit in the refrigerator. The bright red, firm and fine-grained flesh that is super sweet. The thick tough rinds resist cracking and when ripe they turn almost black.

4g Pkt **WET37739**
 1000 Seeds **CHAR37730**
 5000 Seeds **CHAR37765**
 10000 Seeds **CHAR37736**
 1/2oz **CHAR37734**
 1/2lb **CHAR37731**

F: Yellow Doll

Hybrid

Very small "icebox" variety with unique bright yellow flesh that is crisp and extra sweet and thin rinds. The compact vines are ideal for small gardens.

590mg Pkt **WET37779**
 1000 Seeds **PETO37771**

Watermelon

	Days to Maturity	Fruit Color	Fruit Shape	Weight	Disease Resistant
<i>A</i>	90-100 Days	Rind: Dark Green with Darker Green Veins Flesh: Pinkish-Red	Round	40-50lbs +	None Reported

Potato & Onion *Sets*

Seed Potatoes

Size A
Baseball Size: 1.5-3.25in

Size B
Golfball Size: 1.5-2in

All Blue

Late maturity with medium yield potential. Tubers are round with a soft, moist texture excellent for steaming and au gratin potatoes and flavor that's great mashed. The skin is a rich purple and is fun-to-grow and cook. Very high in antioxidants, making them extra nutritious.

- 3lb **DVG7110**
- 5lb **DVG46110**
- 50lb Size A **MFE30509**
- 50lb Size B **MFE30506**

All Red

Early maturing and medium yielding. Tubers are medium oblong sized with attractive red skin and white flesh with pink swirls. holds its color during cooking. Best boiled or steamed.

- 50lb Size A **MFE30507**
- 50lb Size B **MFE30505**

Banana Fingerling

Late to mid season maturity with moderate yield potential. Tubers are medium-sized with a crescent-like shape like fingers, small and elongated. They have thin, tender skin and with a gourmet quality flavor that is best boiled or roasted. Because they're so small, you can boil them whole, skin intact.

- 50lb **MFE30595**

Dakota Pearl

Mid-season maturity with a medium high yield. Tubers are uniform in size and round with bright white skin and shallow eyes. Exceptional flavor and the smooth creamy texture makes them perfect for gourmet potato chips; also can't be beat for roasting and velvety potato soup! Good storage.

- 3lb **DVG7107**
- 5lb **DVG46067**

Dark Red Norland

Early Season maturity with a high yield potential. Tubers are medium-large oblong smooth, slightly flattened, medium red skin with moist, firm white flesh. and shallow eyes. Great for boiling, frying and roasting.

- 3lb **DVG7105**
- 50lb Size A **MFE30567**
- 50lb Size B **MFE30568**

Eva

Medium sized round tubers with very bright blemish-free skin and are almost free from pick-outs and internal defects. Excellent table variety and excellent storability.

- 50lb Size A **MFE30508**
- 50lb Size B **MFE30510**

	Soil Requirements	Disease Notes
<i>All Blue</i>	Fertile, well-drained sandy loam soil.	Susceptible to PVLR, PVY, bacterial ring rot, black leg, Golden Nematode Ro1.
<i>All Red</i>	Fertile, well-drained sandy loam soil.	Susceptible: black leg, fusarium dry rot, leaf roll, phoma rot, PVX and PVY
<i>Banana Fingerling</i>	Fertile, well-drained sandy loam soil.	Susceptible to leaf roll, late blight, verticillium wilt, and potato viruses
<i>Dakota Pearl</i>	Fertile, well-drained sandy loam soil.	Susceptible to foliar and tuber late blight, and bacterial ring rot.
<i>Dark Red Norland</i>	Fertile, well-drained sandy loam soil.	Susceptibility -- (vine) most viruses, early dying (Vert. wilt), black leg, and blights; (tuber) seed decay (dry rot) and silver scurf
<i>Eva</i>	Fertile, Well drained sandy loam soil.	Susceptible to Potatoe Leaf Roll Virus, Black Dot, PCN Pallida, and PCN PO1. Moderately Susceptible to PVY.

See chart on page 121 for more information

Seed Potatoes

French Fingerling

Late to mid-season maturity with a high yield. Produces medium to large oblong tubers with a firm and moist texture firm and moist. Their flavor is mild, nutty and earthy, and they are great for boiling, baking, roasting and potato salads, and bad for soups.

50lb MFE30596

Irish Cobbler

Early maturing with medium yield potential. Tubers are round to oblong shaped with lateral eye depth ranges from shallow to deep. Skin color is creamy white and texture is smooth. A delicious flavor with a nutty aroma is perfect for mashing, boiling and baking.

3lb DVG7109
 5lb DVG46069
 50lb Size A MFE30537
 50lb Size B MFE30538

Katahdin

Late maturity with a medium to high yield. Tubers are round to oblong with buff, smooth skin and creamy white flesh. Lateral eyes are shallow and apical eyes are moderately deep. The waxy flesh is delicious boiled, baking and in potato salad. Great storage ability.

50lb Size A MFE30587
 50lb Size B MFE30588

Kennebec

Mid-season maturity with a high yield of large tubers. Tubers are oval shaped with a smooth texture and skin and shallow eyes. The white flesh is perfect for frying, boiling, mashing or baking. Stores well.

3lb DVG7102
 50lb Size A MFE30557
 50lb Size B MFE30558

Red Chieftain

Medium maturity with high yield potential. Tubers are oblong to round, medium thick with a smooth, medium red skin and white flesh. Eyes are shallow and well distributed on tubers. Good for baking and boiling, but are not ideal for chips. Good in storage.

50lb Size A MFE30517
 50lb Size B MFE30518

	Soil Requirements	Disease Notes
French Fingerling	Fertile, well-drained sandy loam soil.	Overall disease problems are minimal. Bananas are susceptible to mosaic.
Irish Cobbler	Fertile, well-drained sandy loam soil.	Susceptible to Early blight, scab, late blight, tuber rots, virus complex, fusarium, verticillium and bacterial wilts
Katahdin	Fertile, well-drained sandy loam soil.	Susceptible to scab and does not have a high degree of resistance to other major diseases.
Kennebec	Fertile, well-drained sandy loam soil.	Resistant to PVA and PVIY; moderate resistance to PVS, PVX, blackleg, and foliage late blight.
Red Chieftain	Grows well in clay soils	Susceptible to black leg, fusarium dry rot, leaf roll, phoma rot, PVX and PVY

See chart on page 121 for more information

Seed Potatoes

Red La Soda

Main season maturity with a high yield. Tubers are round and somewhat oblong with smooth, bright red skin and white flesh. When first harvested, they are waxy and good for boiling. After a time in storage, when some of the sugar has been converted to starch, the potato becomes somewhat more suitable for baking and mashing.

3lb **DVG7106**
50lb Size A **MFE30577**
5lb **DVG46066**

Red Pontiac

Late season maturity with a heavy yield potential. Tubers are round to oblong with dark red skin and white flesh with medium to deep eyes. Good for baking, boiling, mashing, roasting or in salads. Red potatoes may be cooked with the skin on.

3lb **DVG7104**
50lb Size A **MFE30577**
50lb Size B **MFE30578**

Russet Burbank

Medium to late maturing variety with a moderately high yield potential. Tubers are large, long and cylindrical or slightly flattened with russeted skin. They eyes are shallow and the flesh is white. Ideal for light and fluffy mashed potatoes. They also fry up crisp and golden brown, and they have a delicate flavor and fluffy texture perfect for baking. Good long-term storage

50lb Size A **MFE30594**
50lb Size B **MFE30599**

Russet Norkotah

Late maturity with a medium yield potential. Tubers are long to oblong, smooth, russeted and have shallow, bright golden eyes. Tuber flesh is white, dormancy is medium and sprouts are white with some purple pigment at the tip.

3lb **DVG7103**
50lb Size A **MFE30597**
50lb Size B **MFE30598**

Superior

Medium to early maturity with a medium to high yield. Tubers are smooth and oval with buff skin and white flesh. Superior potatoes are reliably good, no matter how you prepare them: baked, steamed, mashed, boiled or fried. Good in storage

3lb **DVG7108**
5lb **DVG46068**
50lb Size A **MFE30547**
50lb Size B **MFE30548**

Yukon Gold

Very early maturity with moderate yields. Tubers are slightly oval, may be somewhat flattened with yellow-white skin and light yellow tuber flesh. Its shallow, pink eyes distinguish Yukon Gold from other yellow skinned potatoes. Ideal for boiling, baking and frying and will also withstand grilling, pan frying, and roasting.

3lb **DVG7101**
5lb **DVGYG56**
50lb Size A **MFE30527**
50lb Size B **MFE30528**

	Soil Requirements	Disease Notes
<i>Red La Soda</i>	Fertile, well-drained sandy loam soil.	Susceptible to scab, early blight, late blight, corky ring spot, and bacterial wilt.
<i>Red Pontiac</i>	Fertile, well-drained sandy loam soil.	Susceptible to most common potato diseases.
<i>Russet Burbank</i>	Fertile, well-drained sandy loam soil.	Susceptible to bacterial soft rot, dry rot, leak, pink rot, silver scurf, black scurf, seed-piece decay, wilts, early blight, leaf roll and net necrosis, PVX and PVY, and bacterial ring rot.
<i>Russet Norkotah</i>	Fertile, well-drained sandy loam soil.	Susceptible to all common viruses, early dying, black dot, both blights, blackleg/soft rot, dry rot, pink rot, leak, seedpiece decay, silver scurf.
<i>Superior</i>	Fertile, well-drained sandy loam soil.	Susceptible to blackleg, fusarium, leaf roll, viruses X and Y; and highly susceptible to Verticillium wilt.
<i>Yukon Gold</i>	Fertile, well-drained sandy loam soil.	Moderately susceptible to common scab, PVY, early blight, dry rot, silver scurf and black scurf; Susceptible to soft rots in storage. Slightly susceptible to hollow heart (hollowed center of potato).

Garlic Bulbs

European White Softneck

Flattened bulbs of white silver color. 6 to 10 cloves with high compaction in the bulb. Flavor is medium sharpness, intense aroma and mild intense taste. Grows best in Fall, cool season crop.

50 bulbs **DVGGA10**
 100 bulbs **DVGGA30**

Elephant

Delicious mild garlic-like flavor, can be sliced for salads or cooking. The bulbs commonly weigh a pound or more. One plump 1.5in bulb averages 10 cloves. Very easy peeling and keeps very well. Requires winter protection in the North.

10lb **DVGEG10**

Shallot Bulbs

A great alternative to garlic. Plant sets in spring and harvest in the Fall. In the South, plant them in the ground over the winter for Spring harvest. Shallots have a rich and sweet flavor that lends a distinctive touch to many dishes. Add an intriguing depth of flavor and much more subtle note than onions. Stores best in cool, dark and dry space.

10lb **DVGS10**
 32lb **DVGS32**

Onion Sets

Yellow Stuttgarter

Stuttgarter type onion that produce medium sized bulbs with strong flavor and have a semi flat shape. Yellow Onions are full-flavored and are a reliable standby for cooking almost anything. Yellow onions turn a rich, dark brown when cooked and give French Onion Soup its tangy sweet flavor. Excellent in storage.

32lb **DVGYST32**
 32lb Oversized **DVGY2**

Globe

A torpedo shaped onion (bottleneck). Used primarily for growing medium sized bulbs. Good storage.

32lb **DVGGL32**
 32lb Oversized **DVG42325**

Red

Has excellent color and will produce medium sized bulbs with strong flavor. Red Onions, with their wonderful color, are a good choice for lots of fresh uses or for grilling, charbroiling, and roasting. Good in storage.

32lb **DVGR32**
 32lb Oversized **DVGR2**

White

Will produce medium sized bulbs with strong flavor. White Onions are often used in prepared salads, white sauces, and is the traditional onion for classic Mexican cuisine. They have a golden color and sweet flavor when sautéed. Good in storage.

32lb **DVGW32**
 32lb Oversized **DVGW2**

Sweets

We ship Granex onion sets (A short-day type) to the southern states and Intermediate-day sweet onion sets to the rest of the states. Our short-day sweet onion has been described as "sweet as an apple" with its mild flavor. Great fresh, grilled and even raw. Our intermediate-day variety is much like "Candy Sweet Onion" but stores better. They are fantastic thinly sliced and served in salads or on top of sandwiches. Sweet onions tend to be more perishable and should be store in the refrigerator.

10lb **DVGSW10**
 32lb **DVGSW2**

	Soil Requirements
Garlic Bulbs	Well-drained, loose soil
Shallot Bulbs	Well-drained, nutrient-rich soil
Onion Sets	Well-drained, nutrient-rich soil

Herbs

Amaranth

A: Red Garnet

Mild flavor. Elevate dishes with this unique, fuchsia-colored micro. Organically grown.

800mg Pkt **WET45299**

Anise

B: Anise

Aromatic seeds that produce a pungent flavored herb that resembles fennel and licorice. Used for both medicinal and culinary purposes. Anise is a great plant to attract butterflies and bees to your garden.

560mg Pkt **WET45019**
 1oz **WWS45011**
 1/4oz **DSI45016**
 1/2oz **DSI45014**

Amaranth

Savory

A: Summer

Is an annual, but otherwise is similar in use and flavor to the perennial winter savory. It is used more often than winter savory, which has a slightly more bitter flavor. It has a delicate, piney-pepper flavor is likened to thyme in culinary dishes. Its sweet-spicy flavor adds just the right touch to eggs, fish, green beans, poultry, meats as well as being used as an "antiseptic" for the entire digestive tract. Blooms attract bees and other beneficial insects to the garden.

700mg Pkt **WET45149**
 1/4oz **DSI45142**
 1/2oz **DSI45146**

B: Winter

Winter savory is a good addition to meat and bean dishes. Stronger flavor than Summer savory. Easy to grow plant also makes an attractive border plant for your herb garden.

Flower *Seeds*

Annual Flower Seeds

Ageratum

A: Blue Mink

Known commonly as a floss flower. Grows in a petite and compact form with soft, round, fluffy flowers. Attracts butterflies and has a spicy fragrance. Perfect for adding texture and color to bedding, borders and containers. Grows best in well-drained soil with 20-30% clay growing substrate.

175mg Pkt **WET53019**
 1/8oz **HEM53015**
 1/4oz **HEM53016**

Alyssum

B: Carpet of Snow

Honey fragrant flower with lots of crisp white blooms. Grows with a ground cover-like habit. Attracts butterflies. Alyssum is one of the easiest flowers to grow from seed being almost totally free of pest and diseases. Perfect choice for ground cover, edging, or container growing.

280mg Pkt **WET54039**
 1/4oz **WWS54036**

Dusty Miller

C: Silverdust

Known for its attractive silvery-gray foliage and mounding form. The lacy, lobed and deeply cut leaves make a fantastic accent plant with its silvery-white, oak-shaped foliage covered with a very soft, dense fuzz. It will produce small white flowers in the summer and while the small blooms are somewhat attractive, they are usually trimmed because the plant is normally grown as foliage. Makes a lovely accent and texture plant that pops against bright green or bright colored flowers in beds, borders or containers.

Marigold

B: Tall Crackerjack Mix

Tall plant that has a mound-forming habit with long, sturdy stems growing to a height of approximately 3ft. The majestic 3-4in flowers, borne well above the foliage, are in shades of tangerine orange, rich gold, and lemony yellow. This variety is a very early bloomer and free flowering strain with an abundance large carnation-like, puffy flowers with big double blooms. Only down side is that they have a rotting, moldy smell. Perfect flower for the back of the flowerbed or to add to a meadow, the color will remain all summer long.

280mg Pkt **WET90159**
 1/2oz **ASC90157**

C: Dwarf Brocade Mix

Dwarf plant with neat, compact growth habit and elegant dark green foliage. This variety produces an abundance of 2in blooms that perch atop 10-12in tall plants. The blossoms are frilly, ruffled double flowers in shades of rust, yellow, orange, red and bicolors. They are just the right height for edging flowerbeds and borders. All Marigolds have a scent that is strong and effective in repelling many garden pests yet attractive to beneficial insects.

D: Dwarf Lemon Drop

Dwarf plant with small, compact growth habit and low mounds of lacy foliage with a strong citrusy scent. The leaves are edible and can be used as salad greens or garnish. The Lemon Drop variety is known for its small compact size, averaging a height of about 5.85in. If planted in the vegetable garden, it takes up little room, attracts beneficial insects and bees to help pollinate your veggies. The blossoms produce an abundance display of adorable, sunny yellow, petite flower with canary yellow petals and a crested center that has a little orange to it. These little gems will add bright spots of color to the front of bed and borders, in containers or even as an annual groundcover.

Morning Glory

A: Flying Saucer

A vigorous climbing vine with large, dense, heart-shaped leaves that create a tropical effect. This fast growing vine will shoot up to 15ft and it has huge 5in funnel shaped blossoms of pure white with unique periwinkle blue stripes and sometimes flecks. The flowers open in the morning and close in the evening. Attractive to butterflies and bees. Morning Glories are natural climbers that will climb anything in their path. Great trailing from window boxes and planters or climbing up a trellis, arbors or fences.

1.5g Pkt **WET90779**
1oz **HEM90775**

B: Grandpa Ott

A vigorous climbing vine with large, dense, heart-shaped leaves that create a tropical effect. This fast growing vine will shoot up to 15ft and it has 3in funnel shaped blossoms that are a striking deep purple with magenta stars in the throats. The flowers open in the morning and close in the evening. Attractive to butterflies and bees. This variety was once an endangered heirloom but is now available again. It is also said that this is probably the easiest variety to grow, and it will self sow even in cold climates. Morning Glories are natural climbers that will climb anything in their path. Great trailing from window boxes and planters or climbing up a trellis, arbors or fences.

1.5g Pkt **WET90789**

Snapdragon

A: Dwarf Magic Carpet Mix

Miniature, bushy, ball shaped plant that hugs the ground in a carpet-like habit that grows ankle-high and is tightly packed with vivid blossoms in a wide range of colors in exciting blends of reds, pinks, yellows and whites. Excellent grown in masses as bedding plants or in rock gardens, borders, window boxes or as a groundcover.

20mg Pkt **WET51219**
 1/4oz **HEM51213**
 1/2oz **HEM51214**

B: Rocket Mix

Vigorous very tall, sturdy erect plant that reach a uniform height and a clump-forming habit with medium green, lance-shaped leaves. Commonly grown as an annual, snapdragon is actually a short-lived perennial. The upright spikes have distinctly lipped flowers that snap open and shut when squeezed, hence the name "snapdragon." The blooms open from the bottom up on long spikes, so the lower blooms are in full flower when the tip of the spike is still tightly budded. The flowers emit a rich, spicy scent. Perfect for beds or planted behind lower growing plants. Excellent as long-lasting cut flowers.

20mg Pkt **WET51119**
 1000 Seed Pkt **PAS151118**

Statice

C: Mixed

Also called Sea Lavender. Plants have a compact, uniform habit with many branched stems. The leaves are produced in a dense basal rosette, with the flowering stems bearing only small brown scale-leaves. The flowers are on sturdy stems and are tiny funnel-shaped with a delicate, airy, hazy appearance. The dense, papery flowerheads cover the plant in beautiful open clusters of dainty blossoms of white, yellow, rose, blue and lavender. Attracts butterflies and are ideal for beds, borders, cut flowers and when dried they holds their rich color for years.

Sweet Peas

A: Late Spencer Mix

Strong slender stemmed, vigorous plants that can be trained as cordons on supports for high quality blooms or allow them to grow freely to make a colorful screen. The late Spencer Mix includes a random mix from the entire range of the Spencer types producing multitudes of fragrant blooms. The blooms produce multitudes of larger than average pea-like flowers with heavily ruffled, frilly-edged petals are renowned for their deliciously strong scent. Attractive to bees and butterflies. Excellent as cut flowers, or mass planted in beds, borders containers, window boxes or climbing on trellises and arbors.

2.7g Pkt **WET91639**
1oz **HEM91638**

B: Old Spice Mix

Plant is climbing type with weaker stems (that should be trellised) than the modern hybrid varieties however perfume is better than that of any modern sweet pea around. This ornamental pea plant grows to about 7-8ft and will be literally smothered with beautiful small flowers with an intense orange-jasmine-honey scent. The pea-like flowers come in shades of white, cream, pink, rose, scarlet, and purple. This variety was bred for good heat tolerance, is attractive to bees and butterflies and makes an excellent cut flowers, or planted in beds, borders containers, window boxes or climbing on trellises and arbors.

2.7g Pkt **WET91689**
1/2 oz **ENVS91687**

C: Royal Scarlet

Plant has a vigorous climbing habit with long, sturdy stems. The vines can grow up to 10ft and the large blossoms are carried well out from the vine on strong stems. The vines produce an abundance of bright and graceful scarlet large blooms that have a lovely fragrant scent. Attractive to bees and butterflies. Vines can be trained to climb fences, trellises, screens or light posts or plant to cascade from containers and hanging baskets. Perfect as a cut flower too.

2.7g Pkt **WET91659**
1oz **HEM91658**

D: Semi-Dwarf Knee High Mix

A "bushy" semi-dwarf plant with a compact, non-climbing, border-type habit with shorter vines, needing little or no support. A perfect alternative for smaller spaces with limited "climbing" access. A heavy bloomer of fragrant flowers offers a symphony of colors that are multiple florets of pea-like blossom. The long lasting blooms have a wonderful scent and beauty that are a perfect addition to cut flower bouquets. Excellent to grow on short trellis or plant to cascade from containers, baskets, and window boxes.

2.7g Pkt **WET91669**
1oz **WWS91668**

E: Supersnoop Mix

A "bushy" dwarf plant with a compact, non-climbing, border-type habit, growing only 2-2.5ft at the most, needing little or no support. The plants has deep green foliage and has no tendrils, so it stays low and compact. The plant produces wonderfully scented flowers that are clustered tightly on lush stems in shades of scarlet, rose, blue, white and pink. Attractive to bees and butterflies. Ideal for low hedging in beds, borders or along walkways, in containers or as a cut flower.

Biennial Flower Seeds

Canterbury Bells

A: Cup & Saucer

Biennial plants form a low rosette of green leaves in the first year. The following summer, tall upright stems will bloom with lots of large dangling bells, hanging from extra petals that form the saucer. The tall bellflower will produce single or double flowers in white, blue, or pink. Mature plants will self-seed readily. Attractive to butterflies and bees. Ideal for borders and cutting for flower arranging or an excellent backdrop for shorter annuals and perennials.

470mg Pkt WET59709

Daisy

B: Black Eyed Susan

Commonly known as Back-Eyed-Susan, State flower of Maryland. Plants have a clumping growth habit with 2ft tall mounds of foliage. Leaves are alternate and covered by coarse hair, with stout branching stems. Flowers have deep golden petals that radiate from chocolate centers. Deer resistant and drought tolerant. Ideal for beds, borders, containers and cut flowers.

Primrose

D: Evening

Many consider this flower a wildflower. The plants have slender leafy, hairy branched stems, often purple-tinged. The lance shaped leaves are 2-3in long and progress singly (alternate) up the stem. As the name suggests, the flowers open wide at twilight and close by noon. The saucer shaped, canary-yellow, four-petaled flowers are up to 2in across and have a lemon-scented fragrance. The plant takes 2 years to complete its life cycle, with basal leaves becoming established the first year, and flowering occurring the second. It is considered to have a wide array of medicinal uses from relieving headaches, inducing labor, curing baldness, weight loss, upset stomach, hemorrhoids, treat bruises and as a treatment for laziness. Ideal for beds and borders.

Milkweed

Milkweed

C: **Butterfly**

Also known as a Butterfly Weed or Asclepias. This bushy plant was originally a wildflower but is now prized as a garden perennial also. The abundance of stiff, lance-shaped foliage provides a dark-green backdrop for the showy flower heads. The leaves are mostly alternate, 1.5-2.25in long, pointed, and smooth on the edge. The large 2-5in, flat-topped clusters of bright-orange flowers sit on top of the flowering stem. The brilliant orange blooms light up meadows dramatically, and of course attract butterflies. Once established, is a tough, dependable color maker that creates delightful cut flower.

Poppy

B: Iceland Gartford Giant Mix

Plants form a low tuft of light green leaves with delicate foliage and tall, leafless hairy stems that dance in the breeze. The showy blossoms are large satiny cup shaped with a texture like crepe paper and are lightly fragrant. The colors range in subdued pastel colors of apricot, gold, tangerine, and white. The flowers attract birds, butterflies and bees. All parts of the plant are mildly toxic, but acrid enough that animals will not eat them. Perfect for beds, borders and excellent for cutting, if picked just as the buds begin to open.

175mg Pkt **WET88349**

C: Oriental

Plants form a low tuft of light green leaves with delicate foliage and tall, leafless hairy stems that dance in the breeze. The showy blossoms are large satiny cup shaped with a texture like crepe paper and are lightly fragrant. A charming Asian variety with large glowing red-orange flowers with a black eye. Flowers can be more than 6in across on stems to 3ft in height. The flowers attract birds, butterflies and bees. All parts of the plant are mildly toxic, but acrid enough that animals will not eat them. Perfect for beds, borders and excellent for cutting, if picked just as the buds begin to open.

Poppy

	Bloom Color	Zone	Germination Time	Blooming Season	Maximum Height	Spread	Blossom Size	Exposure / Light Requirements
<i>B</i>	White, Yellow, Gold, Apricot, & Orange	3-7	7-14 Days	Late Spring to Early Summer	18-24in	18-24in	3-4in	Full Sun
<i>C</i>	Scarlet	3-8	14-21 Days	Late Spring to Early Summer	24-36in	6-24in	5-8in	Full Sun

Viola

D: Johnny Jump-Up

Also known as wild pansy being a smaller relative of the pansy. A clump trailing plant with heart-shaped deep green leaves. Once established it can spread rapidly but is not invasive. The abundance of tricolored blossoms are small and delicate. Violas withstand cold and heat better than pansies and bloom longer on neater plants. Lovely to plant in beds, borders, edging and rockeries and filling in under trees or in between larger shrubs.

Flower Planting Guide

Plant	Seeds per oz.	Germination Light	Time for Germination	Germination Temperature	Growing Temperature	Comments
Ageratum	200,000	L	8 days	70-80°	60°	Should not be offered until after danger of frost. Responds well to B-nine.
Alyssum, Annual	90,000	L	8 days	70°	50-55°	Shows toxicity to Benlate. Better color if grown cool. Does best in full sun.
Alyssum, Perennial	30,000	L	3-4 weeks		60°	Sow July/Aua. Over-winter in cold frames.
Aquilegia	15,000	L	3-4 weeks	70°	55-60°	Chill seed 4-5 days before sowing. Faster germination at higher temp but aives auality seedlinQS.
Asters	12,000	D	8-10 days	65-70°	55°	Flowers in 9-11 weeks. Give shade in hot months. Needs additional light Sept- April.
Balsam	33,000	D	8 days	70°	60°	Cover seed lightlv.
Begonias, Tuberous	2,000,000	L	15-30 days	65°	65°	Do not expose to full sunlight. Transplant asap. Feed lightly as soon as seedlings emerge.
Begonias, Fibrous	2,000,000	L	2-3 weeks	70°	60°	Does not cover seed; keep evenly moist.
Bells of Ireland	4,200	L	3-4 weeks	80° day	60°	Prechill seed. Alternating temp improves germination.
Browallia	115,000	L	15 days	70°	75°	Does well in shaded area. Do not cover seed. Ideal in hanging baskets.
Calendula	3,000	D	10 days	70°	50°	Sell with pansies, can take cool temperatures.
Campanula	150,000	L	2-3 weeks	70°		Sow July-Sept. Over-winter in cold frames.
Candytuft, Annual	9,500	L	8-9 days	70°	50°	Do not water with cold water.
Chrysanthemums	72,000	L	2-3 weeks	60°		Espose seed to light.
Coreopsis	11,000	L	2-3 weeks	75°		Sow in December for May sales.
Dahlia	2,800	D	7-10 days	75°	50°	Needs short day for flowering. Give proper spacing.
Daisy, Pyrethrum	18,500	L	12 days	60-65°	55-60°	Will sell in pack green if seeded in January.
Daisy, Shasta	18,000	L	12 days	60-65°	55-60°	Slow and irregular germination.
Daisy, Gloriosa	45,000	L	14 days	70°	60°	
Daisy, Livingston	100,000	D	14 days	60°		Grow in cool greenhouse.
Delphinium	10,000	D	18 days	70°	40-50°	Prechill seeds. Seed is not long lived; do not store.
Dusty Miller (Silverdust)	90,000	L	7-9 days	70°		Must have light to germinate.
Foxglove	10,000	L	10 days	75°		Grow cool.
Gaillardia	9,500	L	20 days	75°		Grow cool.
Geranium	6,000	D	14 days	76°	62°	Transplant when small; keep growing.
Gypsophila, Annual	11,000	D	10 days	70-80°	45-50°	
Gypsophila, Perennial	25,000	DL	10 days	65°	50-55°	Does not like wet feet.
Hollyhock	6,000	D	10 days	60°	55-60°	Transplant early, before tap root goes down.
Impatiens	40-60,000	L	18 days	58-60°	55-60°	Direct sunlight inhibits germination; retards growth.
Kale, Flowering	9,000	L	7-12 days	65-70°	55°	Prechill seed.
Larkspur	8,500	D	21 days	55°	60-65°	Do not crowd seedlings.
Lisianthus Russellianus	623,000		21 days	68-77°	59-68°	
Lobelia	700,000	L	20 days	70°	45-50°	Indirect light.
Lupine, Russell's	1,000	D	21-28 days	60-75°	55-60°	Freeze seed 48 hours. Soak in wet towel for 24 hours prior to planting.
Marigolds	10,000	DL	7 days	70-75°	65°	Grow dry to prevent stretch. Use bright light.
Myosotis	42,000	D	14-21 days	70°		Sow in December and grow on as an annual.
Nasturtiums	200	L	14-21 days	70°	60°	Keep water and fertilizer to a minimum.
Nicotiana	300,000	L	14 days	70°	60°	Does well in partial shade. Resoonds well to B-Nine.
Nierembergia	170,000	D	2-3 weeks	so°	55°	Sl ow and irregular germination
Pansy	20,000	D	10 days	70°	45-50°	Prechill seed 5-7 days.
Petunias	285,000	L	7-10 days	80°	50°	Will not bloom if day length is less than 9 hours.
Phlox	14,000	D	10 days	60°	55°	If plants yellow increase temp: transplant asap
Poppy, Annual	15,000	L	7-10 days	75°	65°	
Poppy, Perennial	150,000	L	7-10 days	70°		Sow in late summer.
Portulaca	265,000	D	10 days	70°	70°	Sow directly into packs.
Primula	33,000	L	21 days	60-65°	50-55°	Sow mild summer for spring sales.
Rudbeckia	45,000	L	14 days	70°		
Salvia	7,500	L	14 days	70°	60°	Transplant as soon as possible.
Snapdragon	180,000	L	7-14 days	70°	45-50°	Prechill seeds.
Statice		D	14-20 days	70°	60°	Cover seeds lightly.
Stock	18,700	D	7 days	65-70°	50°	
Strawflower	45,000	L	7 days	70°	60-65°	
Thunbergia	8-1,100	D	12 days	75°	60°	
Verbena	10,000	D	2-3 weeks	70°	60°	
Vinca	21,000	D	2-3 weeks	75-80°	70-75°	Very sensitive to over watering.
Viola	25,000	D	2-3 weeks	65°	50-55°	Culture same as pansies.
Zinnias	24-4,500	DL	5 days	70°	50°	Do not plant more than 7 weeks before sale.

Turf *Seeds*

Alkaloigrass (Salt Resistant)

Fults II

A perennial cool season grass with exceptional tolerance to salt and alkali. Fairly low growing, produces a feather seedhead at 18 inches.

50lb **MSV107007**

Athletic Mix

Fairway

80% Named Varieties of Turf Type Perennial Ryegrasses, 20% Named Varieties of Kentucky Bluegrasses. Specifically formulated for athletic fields, golf course fairways, as well as residential applications.

50lb **MSV177717**

Thermal

90% Named Varieties of Turf Type Tall Fescue, 10% Fahrenheit 90 Heat Tolerant Hybrid Kentucky Bluegrass

50lb **WET173129**

Bentgrass

Penncross

Produces a perennial creeping turf grass with aggressive lateral growth, vigor, and wear tolerance. Provides a smooth surface for putting greens and a dark green uniform turf with an upright growth habit with the ability to recover quickly.

25lb **MSV103027**

Bermuda Grass

Hulled

Makes an excellent low maintenance, drought resistant lawn or pasture grass. A crawling grass with runners providing great traffic tolerance, wear resistance and fine leaf texture with medium green color. Grows well in very sandy and poor soil types where other grasses have trouble. Commonly used for lawn, pasture, turf, erosion, parks and landscaping applications across tropical and subtropical climates.

1lb **MSV104011**
 4lb **MSV104014**
 50lb **MSV104012**

Centi-Seed

Centipede

Easiest of all grasses to cut. Does not look scalped when cutting is delayed too long. Greens up rapidly after a brief drought with irrigation or rainfall.

1lb **PAT108102**
 5lb **PAT108103**
 15ea x 1lb Bags & 3ea x 5lb Bags = 30lb **PAT108106**

Clover

White Dutch

Low growing and longer lasting than Ladino. Works well in bluegrass pasture but not for fescue mixes. Seeding rate: 3-5lbs per acre, 1-2lbs per acre in mixture.

1/2lb **WET109141**
 1lb **WET109142**

50% Turf-Type Tall Fescue / 50% Annual Ryegrass

50lb **MSV171177**

Fescue - Fine

Cardinal Creeping Red

All of the fescues share the same variety characteristics with the three dominant ones being shade tolerant, staying green all year and having good drought resistance. Fine Fescues are more cold and shade tolerant than Tall Fescue but both are used throughout much of the Central to Northern USA states.

50lb **MSV115039**

Creeping Red *Variety Not Stated*

A cool seasonal grass used in the cooler temperate regions of the North. It is a fine fescue and has narrow, deep green blades. Tends to prefer shady, cooler areas. It is often used in mixtures with Tall Fescue, as well as Bluegrass and Perennials Ryegrass. Known for its ability to establish a lawn quickly, as well as the ease of which it is maintained due to its non-aggressive nature. One of the most widely used grasses used to overseed lawns of cool season species of grass.

1lb **WET115041**
 3lb **WET115043**
 25lb **WET115046**
 50lb **BYS115047**

Navigator II Creeping Red

Quickly forms a dense turf under low to high fertility. Good resistance to red thread and snow mold. Superb spring green up.

50lb **MSV115067**

Chewings Compass

A Chewings' fescue that exhibits improved color and density. Better heat and drought tolerance in NTEP trials. Broad spectrum disease resistance, including red thread. Low to moderate fertility requirements.

50lb **MSV115318**

Meadow Mix

Composed of several different Fescue species. All are fine textured compared to most other commonly planted turf grasses. Fine fescues have long been used in mixtures with other grasses and are generally considered the standard for shade tolerance in cool season grasses. Low input and environmentally sustainable grasses.

5lb **WET115395**
 25lb **WET115396**
 50lb **WET115397**

Pennlawn Creeping Red

Similar to chewing's fescue. Fills in quickly which reduces erosion and weed invasion. Good for sod and can withstand some traffic.

50lb **MSV115057**

Chewings Radar

A Chewings fescue that is excellent in overall turf performance under both normal and reduced fertility inputs. Also has excellent drought tolerance and good levels of insect and disease resistance and density retention under stress.

50lb **MSV115040**

Fescue - Hard

Beacon

A hard fescue scores excellent in shade, traffic and seedling vigor. Well adapted to lower fertility inputs. Good disease resistance and drought tolerance.

50lb **MSV115366**

Harpoon

A Hard Fescue well suited for Roadside and Nursery plantings.

50lb **MSV115357**

Jetty

Jetty was ranked highest in the NTEP for shade tolerance. It can handle growing under dense tree canopies. Very dark green in color and classified as one of the darkest green hard fescues available.

50lb **BURL115377**

Fescue - Sheep**Blue Ray**

Drought-resistant bunchgrass, somewhat harder than any of the other fine-leaved fescues. Does not produce much useable forage but provides excellent ground cover. Often called Blue Sheep Fescue due to its bluish-green colored grass blades. Somewhat slow to establish however once established it is very persistent, winter-hardy and drought-tolerant.

50lb **MSV115247**

**Fescue - Tall****Clas Act 2**

A blend of the top 5 turf fescues which produces a dark green, dense turf that is disease resistant and drought tolerant. Specifically blended to persist in moderate shade, a trait not all blends can boast about.

4lb **MSV190804**
16lb **MSV190806**
50lb **MSV190807**

Fawn

A good choice for mixing into pastures where short dry periods may occur. Tolerates poor drainage, alkalinity and salinity.

50lb **MSV115327**

Firecracker SLS

Scored highest NTEP grouping for overall quality under medium fertility, traffic and hot humid environments. It is among the finest in texture, with uniform density, particularly during the summer stress period.

5lb **MSV115145**
50lb **MSV115147**

Kentucky 31

An economical, low maintenance variety that is unique for its increased heat tolerance when compared to other fescue varieties. Has a coarse texture and light green color, easy to establish and tolerates both wear and drought. (Retail packaging)

5lb **WSM115014**
10lb **MSV115015**

Kentucky 31 - 95/85

One of the older "proven" lawn grass varieties with a attractive green, coarse texture. K-31 remains popular still because of its lower price and good overall usage qualities. It is considered drought resistant, is easy to establish, wears well and is more heat tolerant than other Tall Fescue varieties. This tall fescue grass variety is ideal for average lawn and turf use. Kentucky 31 Tall Fescue seed conforms to the strictest standards of quality, easily meeting all state and federal regulations as well as the most discerning customer's expectations. (95 pure seed/85% germination)

25lb **PSH115026**
50lb **PSH778**

Kentucky 31 - 98/85

Economical, low growing, sod forming perennial grass. A cool season grass that has high quality color and texture and will stand close grazing better than tall grasses. Germination average is 21 to 30 days. 5.5 to 7.5lbs per 1000sq ft for hydroseeding, 4-5.5lbs per 1000sq ft for new seeding and 2-3lbs per 1000sq ft for overseeding. (98% pure seed/85% germination)

50lb **MSV115017**

Titanium LS

Thrives under low fertility, reduced irrigation and shade. Particularly adapted throughout the transition zone, its disease resistance to brown patch is excellent.

50lb **MSV115072**

Fescue - Turf Type**Avenger II**

Great for around your home. Can withstand heavy traffic and resists brown patch disease.

5lb **MSV115264**
25lb **MSV115265**
50lb **MSV115266**

Plushtex Mix Lawn Seed

90% Named Varieties of Turf Type Tall Fescue, 10% Named Variety of Kentucky Bluegrasses. All varieties are taken from the MD/VA approved list. Specifically formulated for southern regions. Includes WaterGard

25lb **MSV190896**
50lb **MSV190897**

Raptor III

Tops the charts in color, texture and density. Produces a distinctive turf that not only performs to the rigors of the environment but does so in elegant style.

50lb **WSM115068**

Sypder LS

Scored in the highest NTEP grouping for overall quality under medium fertility, traffic and shade. Top in density under drought, its aggressive behavior crowds out weeds.

5lb **MSV115094**
50lb **MSV115097**

Supersonic

Supersonic has a fine leaf texture and early spring green-up, along with excellent brown patch resistance.

50lb **WSM115417**

Kentucky Bluegrass

85/80 Variety Not Stated

Low growing, sod forming perennial. Withstands a close grazing. 1-2 years to establish and it's best to sow with orchard grass, ryegrass and alfalfa. 85% pure seed/80% germination
 50lb **MSV105039**

Fahreheit 90

A cultivar that resembles Kentucky Bluegrass although medium green in color it readily establishes in most soils and is heat and drought tolerant.
 50lb **WSM105217**

Merit

Merit is an improved variety with excellent turf quality and moderately dark green color.
 50lb **MSV105068**

new

98/85 Variety Not Stated

Low growing sod forming perennial grass. Will stand close grazing better than tall grasses. 98% pure seed/85% germination
 50lb **MSV105017**

Geronimo

Dark in color, very dense with good winter hardiness.
 50lb **MSV105247**

new

Volt

All purpose variety that combines attractive color and density. Exhibits excellent wearability.
 50lb **MSV105308**

Arrowhead

Elite type of bluegrass that shows very high test results in a wide geographical range. Exhibits a bright medium dark green color with fine texture and moderately low growth habit. Good heat hardiness and resistance to leaf spots.
 50lb **MSV105099**

Kelly

Kelly is a medium dark-dark green variety that works well in mixtures with other bluegrasses, tall fescues and perennial ryegrasses.
 50lb **MSV105057**

Wild Horse

Wild Horse is an excellent variety to blend with other bluegrasses, perennial ryegrass, fine fescue and tall fescues.
 50lb **WSM105299**

Warranty Clause

BFG Supply warrants to the extent of the purchase price that seeds or bulbs sold as described on the container, within subject to the limitation of liability herein set forth, we warrant that at the time of delivery the seeds or bulbs sold are as described on the container, within recognized tolerances. Seller gives no other further warranty, expressed or implied. All varieties and species are subject to crop availability.

Poa

Trivialis Starlite

Dark in color, fine textured and compact for better compatibility with leading perennial ryegrass varieties like Slam, Stellar and Flash II. Close mowing quality is excellent and transition back to Bermudagrass in late spring in smoother. Commonly used in mixtures for tee and green overseeding.
 3lb **WET121013**
 50lb **MSV121019**

Ryegrass

Academy III

Has been rated number one for cool season turf use in many different applications. Because of its broad genetic heritage, it performs over widely varying conditions of light, temperature, moisture, soil types and maintenance. Outstanding insect and disease resistance. Is Highly recommended for use in golf courses, sports turf, parks and cemeteries, corporate sites, residential lawns, sod production and overseeding.

50lb **MSV130107**

Annual Variety Not Stated

Excellent choice for building soil structure in orchards, vineyards and other cropland to enhance water infiltration, water-holding capacity or irrigation efficiency. It can reduce soil splash on solaceous crops and small fruit crops, decreasing disease and increasing forage quality. You can also overseed ryegrass readily into corn, soybeans and many high-value crops.

5lb **MSV130014**

10lb **MSV130015**

25lb **MSV130016**

50lb **MSV130017**

Apple SGL

Number one overall rated perennial ryegrass in NTEP trials. Consistent color, dwarf growth and high levels of insect resistance help support cutters high ranking. Wearability and drought tolerance are added benefits that users can depend on.

50lb **MSV130327**

Black Pearl

Bred for both cool season and over seeding performance. Very dark color, quick establishment and fill. Mows cleanly and recuperates well.

50lb **MSV130337**

new

Black Cat II

An aggressive variety that germinates quickly and under varied conditions. Shows excellent wear tolerance.

50lb **WSM130067**

Confetti III

Top overseeding trial results. Dark, dense and durable. Excellent insect and disease resistance. Accommodates fairway mowing heights. Better density retention under traffic, heat and drought stress.

50lb **WSM130066**

Fastball RGL

Excellent seedling vigor and fast establishment for weed suppression. Highly resistant to Rust.

50lb **WSM130047**

Grandslam GLD *bug resistant*

The ideal choice for pristine turf whether the site is fairway, sports turf or lawn care application. Quick to establish and fill in. Improved cold tolerance and increased tolerance to saline conditions.

50lb **MSV130166**

MVP Brand Blend

Very competitive cool season grass, best adapted to coastal regions that have moderate temperatures throughout the year. Prefers full sun but will tolerate partial shade. Has the highest wear-tolerance of any cool-season grass and can tolerate high traffic. Often used around homes, schools and parks.

4lb **MSV190903**

8lb **MSV190905**

16lb **MSV190906**

The Benefits of Wetsel & Emerald Park Turf Blends

For many years Wetsel has blended several varieties, such as blue grasses, ryegrasses, red fescues, etc., to create beautiful, durable lawns. Blends are ideal for over seeding because they tolerate a broader range of soil and weather conditions.

We believe the homeowner's desire for an attractive lawn is best met with a blend of grasses most suited for his area. Few varieties serve the average homeowner well when planted as a pure strand. Blends are more adaptable, and more disease resistant and heat tolerant, hence providing more trouble-free lawns.

Our seed lots have been chosen for their low weed content, maximum purity and germination. The color of our blends is excellent, and in many cases provide better color than a single variety. You can count on Wetsel blends to produce excellent turf.

Premium Turf Seeds

Farm & *Forage*

Alfalfa

Alfalfa is a perennial forage legume which normally lives four to eight years, but can live more than 20 years, depending on variety and climate. Its high yield and quality allow it to be used in feeding programs for many different types of livestock. It is used for grazing, hay, and silage, as well as a green manure and cover crop. The plant grows to a height of up to 3.3ft and has a deep root system. Alfalfa is more drought hardy than drought tolerant.

Alfalfa

Stockpile

Stockpile is a true leader when it comes to performance with an excellent quality, persistence and disease resistance package combined with consistent top yields.

Alone - lbs/acre: 18-25lbs

Mixed - lbs/acre: 10-20lbs

50lb

BYS101197

new

Wetland

Branch rooted alfalfa that tolerates soils that remain wet for extended periods of time. It has branched floating roots that keep the majority of the roots above fluctuating water tables. Possesses excellent winter hardiness and disease package. Medium maturity stage, and excellent regrowth.

Alone - lbs/acre: 18-25lbs

Mixed - lbs/acre: 10-20lbs

50lb

BYS101059

Vernal

A good yielding variety that has good bacterial wilt resistance and excellent winter hardiness.

Alone - lbs/acre: 18-25lbs

Mixed - lbs/acre: 10-20lbs

50lb

BYS101127

50lb Pre-Innoculated **BYS101068**

Wetsel 230 AVP

A blend of alfalfas with Fusarium Wilt, Bacterial Wilt and medium Anthracnose resistance. High yielding and winter hardy with quick recovery, A short rotation alfalfa.

Alone - lbs/acre: 18-25lbs

Mixed - lbs/acre: 10-20lbs

50lb Pre-Innoculated **WET101307**

Barley

A member of the grass family used as an important feed grain in many areas, especially in northern climates. Barley has a short growing season and is also relatively drought tolerant. Its germination time is one to three days. Barley grows under cool conditions, but is not particularly winter hardy.

Barley

Thoroughbred - Certified

High-yielding, awned, six-rowed, hulled winter-feed barley. It is resistant to powdery mildew and barley yellow dwarf virus but is moderately susceptible to net blotch.

Alone - lbs/acre: 86-96lbs

48lb

WIM102187

Birdsfoot Trefoil

A long-lived perennial legume that can provide excellent nutritional value to pasture and additional summer production when grasses often go into a growth slump. Trefoil's branched, relatively shallow taproot makes it less drought tolerant than alfalfa, but it is tolerant of poorly drained and somewhat acid soils.

Birdsfoot Trefoil

Leo

Low growing variety used widely for pasture and reclamation purposes.

Alone - lbs/acre: 8-10lbs

Mixed - lbs/acre: 6-8lbs

50lb

BYS105827

Norcen

A high forage yielder with great persistence. Intermediate growth habits and is very winter hardy with a higher hardiness than Fergus, Dawn, Viking and Empire.

Alone - lbs/acre: 8-10lbs

Mixed - lbs/acre: 6-8lbs

50lb

BYS105817

Brassica

Radish Forage

Brassicicas are annual crops which are highly productive and digestible and can be grazed 80 to 150 days after seeding, depending on the species. Brassica plants include radishes, turnips, cauliflower, rape and kale.

Alone - lbs/acre: 10-15lbs

Brome Grass

Smooth

Leafy and sod-forming cool-season perennial grass that spreads aggressively through both seeds and rhizomes. It grows 15-30 inches high and flowers during late spring and early summer. Because of its highly developed root system, smooth brome grass is resistant to temperature extremes and drought. Its rhizomes and tough root network also make it worthwhile for ground cover and erosion control.

Buckwheat

Buckwheat

A plant cultivated for its grain-like seeds, and also used as a cover crop. The grain is high in the amino acid lysine, which is deficient in other grains and can be used to feed cattle, pigs and chickens. It should be ground and mixed with other grains when fed to livestock, and comprise no more than one-third of the mixture. Buckwheat hay is sometimes used as livestock feed, however it has low forage value. Loosens heavy soils. It also smothers summer weeds and attracts beneficial insects. Can be grown as a seed crop.

Alone - lbs/acre: 48-60

Mixed - lbs/acre: 5-6lbs

50lb **ECS107017**

Canarygrass

Rival Reed Canarygrass

A sod forming variety that grows well in poor soil conditions. Also does very well in poorly drained areas prone to flooding. Excellent winter hardiness.

Alone - lbs/acre: 14lbs

Mixed - lbs/acre: 8-10lbs

50lb **BYS108047**

Chicory

A perennial herb of high nutritional quality. Very palatable, excellent for summer and fall grazing for cattle and deer. Spring seeding is recommended, but early fall sowing is quiet successful.

Chicory

Wild Game

Chicory Plus Mix

Top Choice

90% Chicory, 10% Medium Red Clover. Plus mix contains wina-100 perennial forage chicory which is vastly more tender and palatable to deer than traditional and imperial whitetail clover for maximum attraction, high protein levels, longevity and variety. It is extremely cold tolerant and heat, drought and disease resistant.

Alone - lbs/acre: 8lbs

2lb **MSV156042**
4lb **MSV156043**

Clover

A annual/perennial forage legumes (seeding and nonreseeding) that are desirable in established pastures. High in protein, prolific and survives close grazing. Clovers can also fix a lot of nitrogen. Use white clovers primarily for grazing and red clovers for hay. Both work well mixed with grasses for grazing or silage and bailage. White clovers can last several years while most red clovers typically last approximately 3 years.

Clover

Alsike

A very hardy clover that frequently takes hold where other clovers fail, especially in low, wet soil or high gravel ground. It provides desirable hay and is excellent for improving the soil. Good practice to seed 2lbs with other clovers. Has a place in most all mixes and will keep the cost of your seed mixture down. Caution: Do not feed or pasture to horses. Horses have sometimes been found to suffer adverse effects from alsike clover.

Alone - lbs/acre: 6-10lbs

Mixed - lbs/acre: 3-4lbs

50lb **BYS109017**

Crimson

A winter annual that is usually planted in the late summer to early fall. It can be utilized in pasture, hay, organic farming, pollinator enhancement, silage mixes, or used as a winter cover for soil protection or green manure crop for soil improvement. Grows many striking crimson blossoms that are 1-3ft tall. Dangerous as horse feed if cut when ripe.

Alone - lbs/acre: 10-15lbs

Mixed - lbs/acre: 8-10lbs

1lb **WET109021**
50lb **MSV109027**

Haymaster Medium Red *Variety Not Stated*

A combination of red clovers. Anthracnose and powdery mildew resistance. For increased yields and longevity.

Alone - lbs/acre: 10lbs

Mixed - lbs/acre: 6-8lbs

50lb **WET109063**

Juliet Red

Best suited for pasture mixtures or pure hay strands. Well suited to soils too moist for alfalfa. Has superior winter hardiness and persistence and superior forage yield. Also has fast regrowth and is early maturing with a double cut growth habit.

Alone - lbs/acre: 10lbs

Mixed - lbs/acre: 6-8lbs

50lb **BYS101377**

Jumbo II Ladino White

Jumbo II is an aggressive tillering white clover that was bred and selected for the US market. Its aggressive tillering provides a dense canopy of forage. Although some leaf size was sacrificed to get the denser tillers, research has shown that the largest leaf clovers are not consistently the highest yielders of dry matter.

50lb **MSV109107**

Ladino

Large type of native white clover; makes good quality pasture for livestock. Bloat is a potential problem so it should be planted with other grasses

Alone - lbs/acre: 8lbs

Mixed - lbs/acre: 4lbs

1lb **WET109132**
50lb **BYS109139**

Mammoth Red

Produces a large growth, resulting in greater tonnage on a given area. Provides only one cutting a year

Alone - lbs/acre: 12lbs

Mixed - lbs/acre: 6-12lbs

50lb **BYS109207**

Medium Red *Variety Not Stated*

A biennial legume more easily established than alfalfa. Provides two cuttings of hay a season. Main crop is provided a year after seeding.

Alone - lbs/acre: 10lbs

Mixed - lbs/acre: 6-8lbs

1lb **WET109056**
50lb **BYS109057**

**Millet****Japanese**

Japanese millet is a tall, medium stalked millet that has a 65-90 day life span. It is great for dove fields, duck ponds, deer feed, pheasant feed, cover crops, bird seed and erosion control.

Alone - lbs/acre: 15-30lbs

50lb

PRO118027

Strain R German Foxtail

Strain R German Foxtail Millet grows from 3-6ft tall and produces a dense seed head that resembles a cattail. It has a fast maturity rate and can produce an abundant amount of high quality hay in as little as 40 to 50 days.

Alone - lbs/acre: 15-30lbs

50lb

PRO118017

Millet

A warm season annual, similar to sorghum sudangrass but with no prussic acid. Production is approximately 20% less than sorghum sudangrass, with better digestibility and protein. Can be used for forage, either as hay or grazing, as a component in wildlife or cover crop blends, or as a nurse crop for fall planted alfalfa.

**Oat**

An annual grass mainly used for livestock feeding. It may be grazed, cut-and-carried, made into hay, silage or baling. The oat crop may be used as a winter cover to protect soil from erosion. Forage yield and forage feeding value of the harvested crop change as the oat plant matures.

Oat - Fall**RMI PlotSpike™**

Early season forage nutrition. High yielding of a tender, highly palatable, cold and drought-resistant crop that attracts deer throughout the fall.

Alone - lbs/acre: 100lbs

50lb

RMI27500

Oat - Spring**Armor - Certified**

Mid-season maturing spring oat, medium tall variety with excellent quality grain. High yield potential with stiff straw and bright yellow kernels. Moderate resistance to barley yellow dwarf virus.

Alone - lbs/acre: 64-96lbs

50lb

WIM147088

Burton - Certified

Mid season maturing spring oat, a little taller in variety than Armor and with the same excellent quality grain. High yield potential with stiff straw and bright yellow kernels. Burton is less tolerant to the Barley Yellow Dwarf Virus than Armor.

Alone - lbs/acre: 64-96lbs

50lb

WIM147078

Orchard Grass

A medium to long-lived high producing perennial bunchgrass. Shade tolerant and palatable to livestock and wildlife, especially in the early part of the season. Widely preferred for hay and pasture or silage and is compatible with alfalfa and clover.

Orchard Grass

90/85

Minimum 90% pure seed/85% germination. Grows very well in the spring. Good recovery after cutting hay or grazing.

Alone - lbs/acre: 10-14lbs

Mixed - lbs/acre: 5-8lbs

50lb MSV120097

Amba

Provides very high first cut yields and performs well in mixtures with other grasses and legumes. Digestibility is higher than many other early maturing. Very winter hardy, has the ability to tolerate hard night frosts after spring growth has started.

Alone - lbs/acre: 10-14lbs

Mixed - lbs/acre: 5-8lbs

50lb WSM120117

Pennlate

Late heading, high yield grass. A good late orchard grass that is Somewhat winter hardy. Use with legumes with adaptive maturities. May or June harvest.

Alone - lbs/acre: 10-14lbs

Mixed - lbs/acre: 5-8lbs

50lb MSV120047

Potomac

Early maturing variety that is very productive and persistent. More resistant to leaf disease than common orchardgrass. Recommended with Clover.

Alone - lbs/acre: 10-14lbs

Mixed - lbs/acre: 5-8lbs

50lb MSV120107

Rushmore

Early to early medium maturing with good winter hardiness, bred specifically to improve the nutritional quality for livestock forage. It has excellent palatability and percent protein content.

Mixed - lbs/acre: 6lbs

50lb BYS123017

Ryegrass

Centurion

Annual Ryegrass with proven winter hardiness, high forage yield and improved disease resistance. Selected for cover crop and forage production.

Alone - lbs/acre: 40-45

50lb MSV130036

Crave Tetraploid Perennial

new

Crave is a high yielding, medium-late maturing Tetraploid Perennial Ryegrass with high sugar content which equates to higher palatability and animal gain.

Alone - lbs/acre: 40-45lbs

Mixed - lbs/acre: 15-25lbs

50lb MSV130119

Solstice II

Solstice II is a Transitional Ryegrass as a warm season overseeding grass that is attractive and durable AND transition reliable.

Alone - lbs/acre: 5-10lbs

50lb MSV130169

Tetraprime

Tetraprime establishes the new bench-mark for Italian ryegrass varieties. Selected for grazing applications, tetraprime has excellent grazing tolerance and can be grazed close.

Alone - lbs/acre: 40 - 45

50lb ECS130139

Winter Rye VNS

Cool-season annuals can be used as hay, silage or pasture. Winter Ryegrass decreases dependence on stored forages such as hay and silage and decrease purchased feed expense by providing green grass for grazing in winter months. Grown extensively for grain, cover and forage crop.

Alone - lbs/acre: 84-112lbs

56lb DFC125018

Ryegrass

Two ryegrass species are of great importance in forage/livestock production; annual ryegrass and perennial ryegrass. Both species are easy to establish, versatile in how they can be used and adapted on a wide range of soil types. They are leafy grasses that produce highly palatable forage that often exceeds 70% digestible dry matter and 20% crude protein. These characteristics enable grazing animals to maintain exceptionally high dry matter intake levels and result in outstanding animal performance. Tetraploid ryegrasses offer several benefits in terms of animal performance. The main difference between diploid and tetraploid ryegrass is the number of chromosomes per cell. Diploid plants have two sets of chromosomes per cell whilst tetraploids have four.

Sorghum

Used primarily as silage for livestock and sometimes grown and harvested with soybeans to improve the protein content of the silage. Stems and leaves look very similar to corn.

Sorghum

Supermax

Supermax is an excellent summer annual forage grass. Dark Green color with Anthracnose and Powdery Mildew resistant and has quick regrowth capabilities for multiple cuttings.

Alone - lbs/acre: 25 - 45

50lb GWS142029

Sugar Beets

Wildlife

Sugar Beet leaves and roots are a very palatable food resource for deer. They may be planted with brassicas to improve taste. Can also be used as silage, making an excellent source of protein, carbohydrates and vitamin A.

Alone - lbs/acre: 8lbs

Mixed - lbs/acre: 4lbs

2lb WSM156021

Sunflower

Peridovick Wildlife

An oil seed crop that can grow to a height of 6ft and matures in 100 days. Deer eat the small plants and game birds like turkeys, pheasants and quails well as doves and songbirds love the seeds.

Alone - lbs/acre: 40-50lbs

DNC Great Lakes Water Only Soil

Great Lakes Water Only is an all-natural start-to-finish soil. This living soil is water-only. From seed or clone until harvest, our patented blend of worm castings, steer manure, and chicken compost, along with our incredible list of high-quality amendments creates plant-available food at each stage of development. For novice gardeners Great Lakes Water Only soil works perfectly. Forget mixing chemicals and troubleshooting deficiencies!

GE Lighting Grow Light Balanced Spectrum LED

new

GE Grow Light LED with Balanced Light Spectrum for Seeds and Greens is designed to fit your plant's growth stage. GE's Grow Light uses a balanced spectrum with a red: blue ratio inspired by best practices of professional growers. The balanced spectrum allows not only chlorophyll but also other plant pigments to optimize their light harvesting. Compared to typical purple grow lights, the light features high PPF or Photosynthetic Photon Flux to provide more light for photosynthesis and growth. The white light appears more natural to the human eye, so you can appreciate your plant's beauty and spot pests or discolorations to help keep your plants healthy.
